RE: Huckleberry State Com 502H, 503H, 504H, 505H, 506H & 507H

To whom it concerns:

I am the landman at Concho Resources LLC whose area of responsibility includes Sections 15 and 22 of Township 21 South, Range 33 East, Lea County, New Mexico.

A review of our title records indicates that 100 percent of the interest owners in the W2E2 and W2 of Sections 15 and 22 (both in ownership and quantum owned) are identical.

Respectfully,

Dear Mr. McMillan,

COG Operating LLC (COG), respectfully requests approval for surface lease commingling (CTB) and off-lease measurement of oil and gas for the referenced wells.

The Huckleberry State Com 502H-507H wells have identical ownership in identical percentages. A letter from the responsible COG landman stating this fact is enclosed with this application. The Huckleberry State Com 501H has diverse ownership from the other 6 wells.

All owners of interest have been notified by certified mail that should they have an objection to this off-lease measurement and surface commingling, they must file a formal protest with the NMOCD within 20 days of the date of this application. Proof of owner notification is enclosed.

Please see the following enclosed documents: Administrative Application Checklist, C-107B Application for Surface Commingling, C-102 plats for referenced wells, lease map depicting communitization agreement boundaries with associated wellbores, site facility diagram, facility imagery map, oil offload station map, letter from COG landman, and proof of notification of owners.

Facility Information:

COG proposes to construct the Huckleberry State Com 22 "N" CTB. This facility is located in Section 22, Unit "N" of T21S-R33E. The facility will utilize a bulk production separator and two test separators

May 8, 2019

NM Oil Conservation Division

for the separation and measurement of the production from the 502H-507H wells, which have common ownership. Automated periodic well tests will be used to allocate production back to each well. COG's proposed well testing methodology exceeds API MPMS 20.1 standards in both frequency and accuracy. Well testing frequency for the 502H-507H wells will be defined by the peak production case and will be maintained throughout the life of the wells by utilizing an automated test header.

The 501H well, which has diverse ownership from the other 6 wells, will have its own separator and all oil, gas and water will be measured downstream of the separator, prior to being commingled with the production from the 502H-507H wells.

Oil Production:

Oil production will be measured at each test vessel using Coriolis meters, then all oil streams will be combined to go to the facility's storage tanks. The oil in the tanks will be inventoried, then sold using a Coriolis pipeline LACT owned by Plains Pipeline that is located at the facility. Coriolis meters will be utilized for both custody transfer and allocation of the oil to the individual wells. In addition to the on-lease measurement, the oil production from these wells may also be transported by truck to either the Red Hills Offload Station, located in Unit O, Section 4-T26S-R32E, or the Jal Offload Station, located in Unit D, Section 4-T26S-R37E, Lea County in the event the on-lease tanks are over capacity or in the case of battery or pipeline repairs. In this case the oil will remain segregated and will be measured by LACT meter when offloading at said stations.

Gas Production:

Gas production will be measured at each test vessel using orifice plate gas allocation meters, then all gas streams will be combined to go to the gas sales meter owned by Targa Resources. Orifice meters will be utilized for both custody transfer and allocation of the gas to the individual wells.

Thank you for your attention to this matter. If you have questions or need further information, please email me at dwilbourn@concho.com or call 575.748.6958.

Sincerely,

Debora L. Wilbourn

Good morning Mike,

I have revised our application per your specifications. Would you please let me know if this is acceptable? I would like to have that information before I put new letters in the mail to the interest owners. They are all on my desk, ready to put in the mail, as soon as I hear back from you.

Thank you,

Debora:

Thanks for clarifying the application today

Your application is suspended until you provide a signed statement from a landman about identical ownership in the 502H-507H, and state that the identically owned wells will be measured with a combination of metering and well testing, and the diversely owned will be separately measure before commingling to the affected parties.

Mike,

I did confirm that the Targa meter is not "on" the pad, but adjacent to the pad on the east side, within the unit letter and within the lease/CA boundaries. I have attached a revised facility imagery map to reflect that. I am waiting on Midland to send me a revised site facility diagram that also states where the meter is located. Hope this helps.
