ADMINISTRATIVE POOL/LEASE COMMINGLING ORDER

Administrative Order PLC-583

XTO Energy, Inc.  
Attention: Tracie Cherry

Pursuant to your application received on June 20, 2019, XTO Energy, Inc. (OGRID 5380) is hereby authorized to surface commingle oil and gas production and off-lease measure from the following pools:

CORRAL CANYON; DELAWARE, NORTHWEST (96464)  
WILLOW LAKE; BONE SPRING, SOUTHEAST (96217)

and from wells, their associated leases, pools, and range of decline identified in the application, Exhibit "A" made a part of this order. These wells are located on federal leases and federal Communitization agreements located in, Township 23 South, Range 29 East, and Township 24 South, Range 29 East NMPM, Eddy County, New Mexico.

Production from the subject wells shall be determined as follows:

The following represents the minimum standards approved by Hearing Order R-14299. Applicant may use more stringent measurement methods at their own discretion.

It is understood that the test separator and meters are designed to accurately measure production from the wells with the highest production rate. It is also assumed that all the oil and gas production from the wells in this application will display a hyperbolic decline and will fit the decline parameters described in Hearing Order R-14299. Wells that are in "prior-to" Range 1 of decline shall be tested daily. Wells that are in Range 1 of decline shall be measured with a combination of metering and well testing and shall be tested at least three times a month. Wells that are in Range 2 of decline shall be measured with a combination of metering and well testing and shall be tested at least twice a month. Wells in Range 3 of decline shall be measured with a combination of metering and well testing and shall be tested at least once a month.

The commingled oil production from the wells detailed above shall be measured and sold at the Corral Canyon Central Tank Battery (CTB), located in Unit P of Section 5, Township 25 South, Range 29 East, NMPM, Eddy County, New Mexico.

For future additions of wells, leases, and pools to this commingling operation, notice shall only be given to those interest owners in the wells, leases or pools to be added, in accordance with Division Rule 19.15.12.10 C (4) (g) NMAC.

Subsequently drilled wells that produce from the subject pool within the project areas approved by this order may be added to this commingling authority by submittal of a Sundry Notice to the Engineering Bureau in Santa Fe.

The allocation meters shall be calibrated quarterly in accordance with Rule 19.15.12.10.C (2) NMAC.

XTO Energy, Inc. shall provide a Sundry Notice to the Engineering Bureau in Santa Fe when a test separator is removed.

This approval is subject to like approval from the Bureau of Land Management before commencing commingling operations.

This administrative application was protested by Lynn Charuk; however, the protest was later withdrawn.

The operator shall notify the Artesia District office of the Division prior to implementation of the commingling operations.

This installation shall be installed and operated in accordance with the applicable Division Rules and Regulations.

Wells are assumed to be located in Township 24 South, Range 29 East unless stated

N/A wells have not been drilled

Dedicated meter wells shall be measured at the surface location of each well. If the off-site measurement is not successful, the wells will be measured and stored at the CTB
