Re: C-107 Application For Surface Commingling for Ameredev Operating, LLC

To Whom This May Concern:

Ameredev Operating, LLC, OGRID: 372224, requests to commingle current oil and gas production from Pool numbers 98234, 98150 and 33813. All wells will go through individual three phase separators and each stream (oil, water, gas) will be measured as it exits the three phase separator. Oil will be measured at the three phase separator with a Coriolis meter, gas will be measured with an orifice meter, and water will be measured with a mag meter.

Commingling will happen after the three phase separator. The gas stream will flow into a common line and flow into an additional two phase separator to remove any excess water. Gas from the heater treater and the vapor recovery tower will also be going into the two phase separator before it is sent to our gas gathering pipeline system. The oil will flow into a common line after the three phase separator and will flow into a heater treater and a vapor recovery tower to remove any remaining water and gas in the oil stream. The oil will then go to lined oil tanks to be either trucked off or piped into our crude gathering pipelines. The water will be commingled after the three phase separator into a common line that will flow into a gun barrel before it is pumped into our water pipeline system. The gas will be allocated against a main sales meter and the oil will be allocated against the CTB LACT meter. All meters will be calibrated according to manufacturer's recommendations.

Sincerely
