Re: Application of EOG Resources, Inc. for administrative approval of an unorthodox well location for its Stonewall 28 Fed Com #313H Well in the E/2 E/2 of Sections 28 and 33, Township 24 South, Range 34 East, N.M.P.M., Lea County, New Mexico.

Dear Ms. Sandoval:

EOG Resources, Inc. (OGRID No. 7377) seeks administrative approval of an unorthodox well location for its **Stonewall 28 Fed Com #313H Well** (API No. 30-025-44874) to be completed within the Red Hills; Bone Spring, North Pool (96434), and the WC-025 G-09 S243336I; Upper Wolfcamp Pool (98092) underlying the E/2 E/2 of Sections 28 and 33, Township 24 South, Range 34 East, N.M.P.M., Lea County, New Mexico.

This well has been drilled and completed at a surface location 200 feet from the north line and 693 feet from the east line (Unit A) of Section 28. The *first take point* is located 423 feet from the north line and 1,184 feet from the east line (Unit A) of Section 28, and the *last take point* is located 163 feet from the south line and 1,156 feet from the east line (Unit P) of Section 33. Since this acreage is governed by the Division's statewide rules, the completed interval for this well will be unorthodox because it is closer than the standard offsets to the western boundary of the spacing unit. Approval of the unorthodox completed interval will allow EOG to use their preferred well spacing plan for horizontal wells in this area and thereby prevent waste.

Exhibit A is a Well Location and Acreage Dedication Plat (Form C-102), which shows that the completed interval of the proposed **Stonewall 28 Fed Com #313H Well** encroaches on the spacing unit/tracts to the west in the W/2 E/2 of Sections 28 and 33.

Exhibit B is a plat for Sections 28 and 33 that shows the proposed **Stonewall 28 Fed Com #313H Well** in relation to adjoining spacing unit to the west.

Ownership is diverse between the subject spacing unit and the affected spacing unit to the west. **Exhibit C** reflects the “affected parties” and that a copy of this application with all attachments has been sent by certified mail to each affected party advising that any objections must be filed in writing with the Division within 20 days from the date the Division receives the application.

Exhibit D is statement from a petroleum engineer providing justification for the needed exception.

Your attention to this matter is appreciated.

Sincerely,

Re: EOG Resources NSL Application
Stonewall 28 Fed Com #313H

To whom it may concern:

A non-standard location is necessary to develop the Bonespring formation, specifically the First Bone Spring, in this section efficiently and in an economic manner. A non-standard location optimizes pressures related to the completion and production drawdown of the wells and is expected to yield a higher ultimate recovery than a standard location, thereby preventing waste and protecting correlative rights.

Sincerely,
