Hello Ms. Barron,

I am reviewing the surface commingle application for the Honey Graham State 20 C Central Tank Batter (CTB-964) operated by COG Operating, LLC (229137).

It looks like a set of numbers were left off of the submitted certified tracking numbers for notice. Please send me an updated list with the complete numbers.

Additionally, do you have the affidavit of publication for this application? Considering how few interest owners there are for this application, it may be unneeded, but I have noticed a steep increase in number of notices which are either getting lost in the mail or not getting picked up by the recipient lately.
