**RE: Administrative Order SWD-1878; Second Extension of Deadline to Inject**

Well: Mills 19 SWD Well No. 1 (API 30-025-Pending)  
Located: Unit E, Sec 19, T22S, R32E, NMPM, Lea County, New Mexico  
Order Date: July 29, 2019  
Injection formations: Devonian formation; 16,207 feet to 17,457 feet

Dear Ms. McKee:

Reference is made to your July 7, 2021 request on behalf of Solaris Water Midstream, LLC (the "operator") to extend the deadline stipulated in the above titled order to commence injection for the above referenced well for reasons outlined in your correspondence. The original deadline date to commence injection under said order was one year after issuance: July 29, 2020. However, the Oil Conservation Division (OCD) formally approved the operator's first extension request submitted May 28, 2020, which contained the required information and was submitted prior to the original deadline. Therefore, the OCD shall recognize the first extension request providing a current deadline date of July 29, 2021.

It is the Division's understanding from your correspondence that since the date of issuance of this permit, no additional wells that penetrate the approved injection interval were drilled in the one-mile Area of Review (AOR). Additionally, no new affected parties have been identified in the AOR. Therefore, the extension request could be reviewed administratively for approval.

The Division finds that for reasons you have stated, the granting of this request to extend this administrative order is in the interest of conservation, will prevent waste, and will protect the environment. Therefore, the deadline to commence injection for the existing order is hereby extended until July 29, 2022.

All requirements of the above referenced administrative order and agreements in the application remain in full force and effect. Any additional extension of the deadline to commence injection for this administrative order will not be considered unless the operator has already commenced drilling of the referenced well. Otherwise, the injection authority shall expire under the terms of the extended administrative order and the operator shall be required to submit a new application to obtain injection authority for the referenced well.

ADRIENNE SANDOVAL  
Director
