CAUTION: This email originated outside of our organization. Exercise caution prior to clicking on links or opening attachments.

Rob-

As required in the BXP Operating, LLC ("BXP") SFO Section 6.e dated 6/30/22, I am reporting to the NMOCD regarding BXP Operating, LLC activities during the previous quarter to reduce the number of inactive wells through plugging or return to active status.

Please find attached the following:

- 1) A copy of the previously filed ACOI Well Report #1 for the quarter ending 9/22 with Action ID #s added.
- 2) ACOI Well Report #2 for the quarter ending 9/22 – this report is a list of wells plugged by BXP prior to the first reporting quarter of 9/22, and based on my understanding of the BXP SFO, should be credited toward the required quarterly P&A count (12 wells per quarter).
- 3) ACOI Well Report #3 for the quarter ending 12/22 – during this quarter, BXP had some difficulty obtaining P&A services due to limited service availability.
- 4) BXP has plugged a total of 27 wells as per the attached reports during the 2 quarterly reporting periods ending 9/22 and 12/22.
- 5) J & B Well Service is currently on BXP locations and is scheduled to plug an additional 12-14 wells in Q1 2023 if possible. These wells are identified on Rows 74-87 on the C-103 P&A NOI List (dark blue category on attachment), which include 5 NM State wells.
- 6) After 5) above, there are 12 additional wells on the C-103 P&A NOI List scheduled for P&A, which include 10 NM State wells.

Please review and let me know if more information is required.

Thanks.

Subject: BXP Operating, LLC NMOCD ACOI reporting

Rob-

As required in the SFO Section 6.e with BXP Operating, LLC dated 6/30/22, I am reporting to the NMOCD regarding BXP Operating, LLC activities during the previous quarter to reduce the number of inactive wells through plugging or return to active status. I am still in need of the ACOI Action ID# Code List which I have been unable to locate on the NMOCD website, so if that is something you have access to, please forward to me and I will add to the ACOI form.

I have also attached my customized spreadsheet which I modified from the online NMOCD Inactive Well List. This list records work already done and provides a glimpse into current and future planned activities as follows:

- 1) Wells already plugged with surface remediation complete and/or in progress but not released yet by OCD/SLO.
- 2) C-103s P&A forms filed and pending or approved – this is the target list of wells where P&A is imminent depending on service availability.
- 3) Target List for future C-103 P&A filing – this a list where return to production or reactivation is unlikely or already condemned.
- 4) Return to Production or Reactivation Plans – these wells all have return to production merit based on prior commercial production/injection levels prior to shut-in – BXP is planning to attempt to return all of these wells to production as soon as contractor services are available. The results of this work will be reported, and if unsuccessful, those wells will move to category 3) above.
- 5) Already returned to Production or Reactivation

In organizing the spreadsheet in this manner, all wells are either going to move down the list toward production and ultimately will be removed from the Inactive Well List, or move up the list toward P&A and will be removed from the Inactive Well List.

Please review and let me know if more information is required.

Thanks.

Subject: Re: ACOI reporting

Rob-

I apologize for the incomplete reporting but I have been busy with a matter where an immediate family member died this week.

This is the first time I have filled out an ACOI report. Our SFO requires we report well activity in the most recent period by today so please see attached my ACOI form. I still need to sign this report and add the Action ID # which I can't locate on any State website, so if you could provide that list or direct me to the website location with that information I would appreciate it.

There is one RTP well where we simply fixed a hole in the tubing. The injection wells listed were determined to be active injectors after recent braiden head inspections, and although they appear on our inactive well list, I believe they have been active since our taking over operations in early 2020.

The wells listed as P&A have been plugged with the surface restorations either complete or in the process of being completed before year end 2022. Additionally we have C103s NOI to P&A filed for approximately 20 others wells which we will get started on in approx. 1-2 months.

I will follow up on this next week and complete everything but the information below will illustrate that we have been diligent in complying with the SFO to remedy the well count problems we inherited from prior operators in 2020.

Thx

Doug Brown

Yes I will thx

Can you direct me to a list or schedule of Action ID #s that need to be used for the ACOI Well Report?

Thanks
