Dylan,

When we sent surveyor to the field for the Anthem Water Solutions, LLC's East Federal SWD #002, they noticed a discrepancy in the location of the P&A well (30-015-23976). The table below shows the location information NMOCD has for this well, in contrast to the information provided by the surveyors:

| Record Type | NMOCD Record | Field Survey |
|-------------|--------------|--------------|
| Unit Letter | L            | 3            |
| Section     | 18           | 18           |
| Township    | 22S          | 22S          |
| Range       | 29E          | 29E          |
| FSL         | 1980         | 1985         |
| FWL         | 660          | 518          |
| Lat         | 32.3911552   | 32.390836    |
| Long        | -104.0295715 | -104.02942   |

This discrepancy identified a potential problem for Anthem, as the East Federal SWD #002 was permitted as a recompletion of 30-015-23976. To better understand the impact of this discrepancy, we performed an affected party analysis based of the surveyors well location. During this review, we determined that the location discrepancy does not change any of the affected parties notified in the original application. Attached is the survey, the revised 1-mile AOR map, 1-mile mineral lease map, and the original affected party notification list demonstrating our finding.

Given that all the appropriate parties were given notice during the original application process, is this something we could fix by submitting a C-103 with the new survey to revise the location? If not, could you provide guidance on how to best address this?

Best Regards,

**Oliver W. Seekins, PMP**
