**Subject:** RE: Emailing: DCP M 28 Line Work Plan Proposal

Vernon,

At this time, I will approve (and recommend) that the highly saturated/contaminated material be removed, as soon as possible, to a disposal facility (land fill or land farm if guidelines allow and DCP chooses) in an effort to mitigate further contamination at the site. I need to physically inspect the site prior to making a decision on the remainder of the proposal. I will tentatively plan on visiting the site Monday, July 18, 2011. If anyone would like to meet on site, I will be available after 6:30 AM Monday morning to coordinate a time to meet. Currently, contact for me is by email or cell phone (575-626-0857). Voicemail is not set up, so if no answer, keep trying, or I will return missed calls.

Good Afternoon Gentlemen,

Please see the attached Remediation Work Plan proposal for DCP's M 28 Line.  
I welcome your feedback and/or comments relating to the work plan as proposed.

Thanks for all your help,  
Vernon
