RECEIVED
SEP 02 2011
NMOCD ARTESIA

If a Watercourse was Impacted, Describe Fully.*
NA

Describe Cause of Problem and Remedial Action Taken. (If water spilled, give Chloride content)*
The W-13 pipeline developed a leak at the coordinates listed above. The pipeline was isolated to prevent additional leakage to the environment and a crew was dispatched to begin the process of making repairs. The pipeline will be repaired by digging up the affected area and applying a clamp to seal the hole. Any contaminated soil will be removed and disposed in an approved OCD landfill. Once the contamination has been removed, the affected area will be backfilled with material indigenous to the area.

Describe Area Affected, Dimensions, and Cleanup Action Taken.*
Affected area consisted of mostly over spray with some liquid that followed cow trails for several feet. Overall dimensions of the spill area is approximately 75 feet by 150 feet.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Greetings,

Your request for closure/backfill is approved. Like approval by BLM or any other regulatory authority, as may be applicable, may be required.

Please submit a Form C-141 Final Report to NMOCD District 2 office for final closure of incident.

If you have any questions or concerns, please contact me.

Mike Bratcher

Subject: Emailing: DCP W 13 Line Closure Request

Good Morning Gentlemen,

Please see the attached Closure Request Packet for DCP's W 13 Line. Please feel free to give me a call if you have any questions.

Thanks,

**HUNGRY HORSE, LLC
ENVIRONMENTAL SERVICES**

Dirt Work * On-Site Remediation * Soil Testing * Excavation

18July11

To: Mike Bratcher, NM OCD
Paul Evans, BLM
Reference: Request for Closure
Location: W 13 Line
Operator: DCP Midstream
Legals: Ul. J, Sec. 14, T19S, R31E
GPS: N32.6610 W103.8363

Site Background

The affected area is west of DCP's Lusk Plant which is located just off CR 126 on Lusk Plant Road. This site is on BLM land with a local rancher having the lease for grazing of cattle. There are no know water wells and no surface bodies of water within 1000' of the site. Based upon the Eddy County Depth to Groundwater Map, depth to groundwater is 300'. Thus, this site receives a site ranking score of "0".

Work Conducted

Upon discovery of the release, the line was shut in and a section, approximately 200', was removed and replaced. The line was left exposed to accommodate remedial action and the remediation process.

Remedial action consisted of promptly recovering the saturated soil and placing it on plastic for disposal. Chloride field test were conducted to determine if chlorides were present. Field test indicated a heavy concentration of chlorides at approximately 1.5' BGS. Trucks were dispatched to transport the saturated material. Due the limited availability of trucks, the excavation and hauling continued with chloride field tests being conducted regularly. At approximately 10' BGS field test indicated chloride contamination had been mitigated.

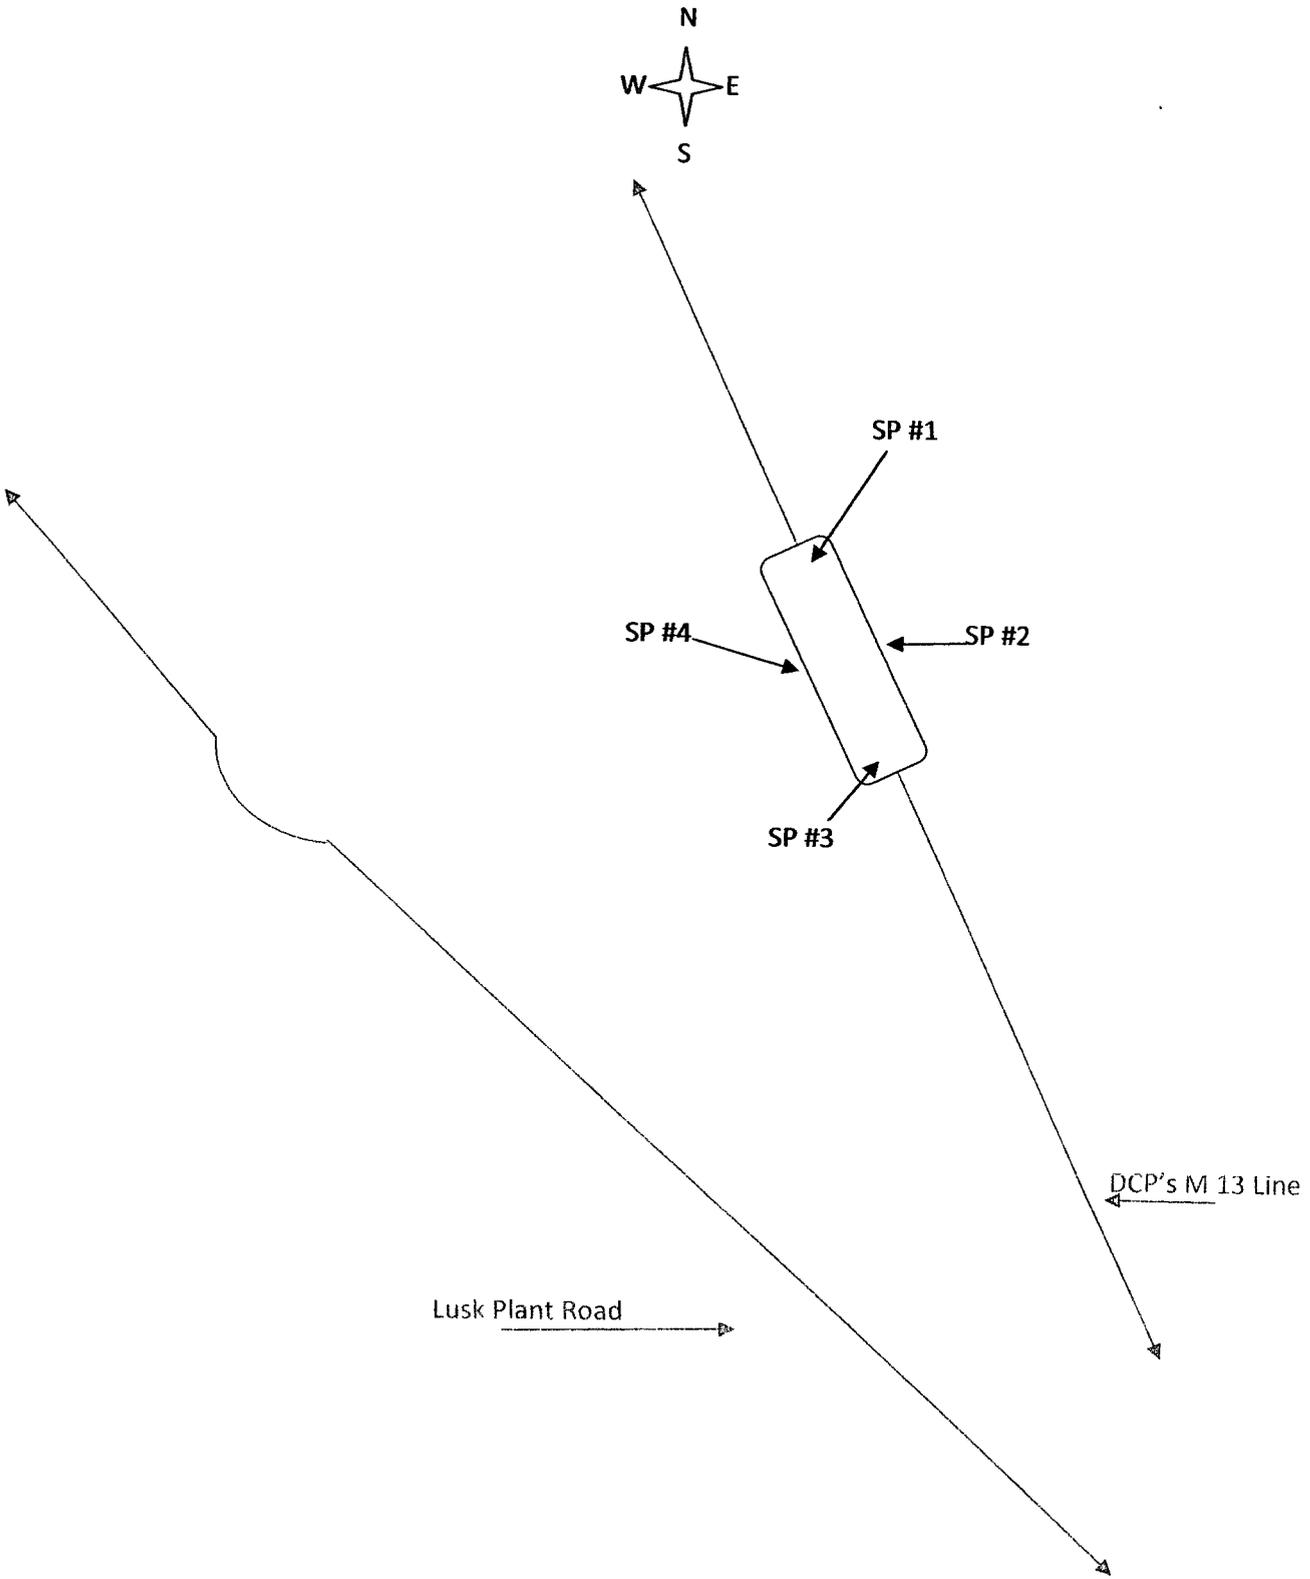

Four soil samples (see attached sketch) were obtained to confirm field test results. Samples were analyzed for TPH, BTEX, and Chlorides. Lab results (see attached) indicated levels at or below required closure limit levels.

I am requesting approval for closure. Upon receipt, the area will back filled with clean material from a nearby source, contoured to match the surrounding terrain, and seeded using a BLM approved seed mixture.

Sincerely,

Vernon K. Black, Hungry Horse, LLC
