**Subject:** RE: SM Energy Parkway 36 State #001

The spill is in Section 36.

Thank you Mike.

I just figured out what went wrong with the data entry, and maybe one of you guys could help clarify.

The API number listed on the C-141 is 30-015-26112. This API number is for SM Energy's Parkway Delaware Unit #101 (O-26-19s-29e). I believe the release is actually at SM Energy's Parkway 36 St #1, which is in F-36-19s-29e with API number 30-015-25671.

Not a big deal, but if someone could let me know if this is in section 26 or 36 I will get it straight.

Thanks,

Aaron,

I have not reviewed the work plan, but with equipment available and in close proximity, please proceed. I actually just discovered an error that was made in the data entry of this release. I will get that corrected and take a look at the proposal. I appreciate Tetra Tech personnel's continued efforts to operate in compliance with OCD rules and guidelines.

Mike –

I know I have not given a whole lot of time for you to review this work plan, but we have a crew excavating a couple sites close by and we would like to start this one as early as this coming Wednesday (10-19-11). Per the work plan, we are more or less removing all of the chloride impacted soils. Please let me know if you have any questions.

Thank you

Hello Mike –

Here is a work plan for a chloride spill from an unknown and unauthorized transport truck. I will put the hard copy in the mail for you tomorrow. Please let me know if you have any questions. We will probably try to work this one into our schedule sometime end of next week.

Thank you

Mike,

This one was a rather quick excavation. We should be ready to backfill sometime tomorrow. We excavated everything in the workplan that had chloride concentrations in excess of 217 mg/kg Chlorides. Please let us know if you would like to visit the site? If not, we will begin backfilling tomorrow.

Thanks.
