Dear Mr. Stogner:

Burlington Resources is applying for administrative approval of an unorthodox gas well location for the Mesa Verde pool. This application for the referenced location is because of very rough terrain, because the Bureau of Land Management does not want access to the bench, and for geologic reasons as described in the attached explanation and maps.

Production from the Mesa Verde pool is to be included in a 317.83 acre gas spacing and proration unit for the west half (W/2) in Section 3 and is to be dedicated to the San Juan 29-7 Unit #11 (30-039-07681) located at 660'FSL, 660'FWL in Section 3, the San Juan 29-7 Unit #11A (30-039-25564) located at 900'FNL, 790'FWL in Section 3 and the San Juan 29-7 Unit #11B which is proposed but postponed to be drilled at this time.

The following attachments are for your review:

- Application for Permit to Drill.
- Completed C-102 at referenced location.
- Offset operators/owners plat - Burlington is the offset operator
- 7.5 minute topographic map
- Geologic explanation and maps

We appreciate your earliest consideration of this application.

Sincerely,

Peggy Bradford
