**NATURE OF RELEASE**

Type of Release: Non-Reportable Acid Discharge	Volume of Release: 4BBLs	Volume Recovered: None
Source of Release: Failed valve on frac tank during acid job.	Date and Hour of Occurrence: 6/19/11 During frac job.	Date and Hour of Discovery: 6/19/11 Immediately during frac job.
Was Immediate Notice Given? <input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom? Mike Bratcher notified as an NR and FYI.	
By Whom? Cheryl Winkler called in the discharge as an NR.	Date and Hour: 6/19/11 Not Required	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse. N/A	
If a Watercourse was Impacted, Describe Fully.*  N/A		
Describe Cause of Problem and Remedial Action Taken.*  The valve on the frac tank holding the acid for the frac job failed. Consequently, 4 BBLs were discharged.		
Describe Area Affected and Cleanup Action Taken.* A total of 4 sacks of soda ash were used to neutralize the acid once it had discharged and flowed off location. J.T. Ross, the rancher, was immediately contacted and the discharge reported. Superior Well Services began to cleanup the discharge immediately, even hauling off some of the more saturated material. The rancher notified M&W that he did not want further disturbance of his land until spring conditions could be viewed. In his experience, this was not a problem at all. In fact, he said he had used soda ash on his land before very successfully.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
