A map is enclosed showing the Federal leases and well locations in Section 19-T22S-R26E and Section 24, 25, 26-T22S-R25E. Working, royalty, and overriding interest owners have been notified via certified mail (see attached).

Oil & Gas metering:

Each well will have its own tank battery on location and will be the only well utilizing that tank battery. The wells are going to commingle gas production at the Enterprise CDP Sales Meter 68435 located in NE Sec 24, T22S, R25E.

The Amoco 19 Federal 1 will flow 1st through a stak-pak, 2nd a check meter 88533123 and then a compressor on location before flowing to the Enterprise CDP 68435.

The Filaree 24 Federal Com 1 will flow 1st through a stak-pak, 2nd a check meter 88533017 and then a compressor on location before flowing to the Enterprise CDP 68435.

The Filaree 24 Fed Com 2 will flow 1st through a 3 Phase Separator, 2nd a check meter 88533018 on location before flowing to the Enterprise CDP 68435. Name change was sent on 9/15/11.

The Filaree 24 C Federal Com 3 will 1st flow through a stak-pak, then check meter 88533022 on location before flowing to Enterprise CDP 68435.

The Filaree 25 H Fed Com 2 will flow 1st through a 3 Phase Separator on location and then check meter 88533049 before flowing to the Enterprise CDP 68435. Name change was sent on 9/27/11.

The Filaree 25 C Federal Com 1 will flow 1st through a stak-pak on location and then check meter 88533124 before flowing to the Enterprise CDP 68435.

The Cuesta Abajo 26 Fed Com 1 will flow 1st through a 3 Phase Separator before flowing to check meter 88533056 on location, it will then flow to the Enterprise CDP 68435.

The BLM's interest in these wells, are the same. Waste is not induced and no correlative rights are impaired. These meters will be calibrated on a regular basis per API, NMOCD and BLM specifications. The BLM and OCD will be notified of any future changes in the facilities.

Process and Flow Descriptions:

Please see attached facility diagrams for each wells' production facility. The flow of produced fluids is shown in detail along with a description of each vessel.

The benefit of the off lease gas measurement, sales, & storage is to help reduce liability with primary exposure to one facility and reduced lease road/location maintenance due to time/wear-n-tear needing spent at each well's location. This will also lessen the surface disturbance due to having all the gas production at one facility.

Devon Energy Production Company, LP understands the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument. Additionally, Devon Energy Production Co., LP will submit within 30 days, an application for right-of-way approval to the BLM and NMOCD section in your office, if we have not already done so.

Condition of Approval Commingling on and off lease

1. This approval is subject to like approval by the New Mexico Oil Conservation Division.
2. This agency shall be notified of any spill or discharge as required by NTL-3A.
3. This agency reserves the right to modify or rescind approval whenever it determines continued use of the approved method may adversely affect the surface or subsurface environments.
4. This approval does not constitute right-of-way approval for any off-lease activities. Within 30 days, an application for right-of-way approval must be submitted to the Realty Section if not already done.
5. Approval for combining production from various sources is a privilege which is granted to lessees for the purpose of aiding conservation and extending the economic life of leases. Applicants should be cognizant that failure to operate in accordance with the provisions outlined in the Authorized Officer's conditions of approval and/or subsequent stipulations or modifications will subject such approval to revocation.
6. All above ground structures on the lease shall be painted Shale Green (5Y 4/2), or as per approved APD stipulations. This is to be done within 90 days, if you have not already done so.
7. Gas measurement for allocation must be measured as per Onshore Order #5 for sales meters.
8. All gas and oil subject to royalty shall be measured as per federal regulations and shall be reported to ONRR as required. All gas which is vented, flared or used on lease shall be reported as per NTL-4A to ONRR. All gas which is vented or flared shall be subject to royalty, unless prior approval was given by the authorized officer.
9. This agency shall be notified of any change in sales method or location of sales point.
10. Additional wells and/or leases require additional commingling approvals.
11. Upon completion of the Habanero 17 Federal com 1H submit MCFPD and BTU. Also need to submit allocation meter number for this well when installed.
