GW@40'

Describe Cause of Problem and Remedial Action Taken.* A 6" steel injection line to charge pumps at the South Hobbs Unit Central Tank Battery developed a hole causing spill. Isolated the line by shutting valves at both ends.

Describe Area Affected and Cleanup Action Taken.* Spill is approximately 10' average width, by approximated 900' estimated length to the SE of leak sitek site. An estimated 50 bbls of injection water was spilled. Volumes and distance estimated due to snow covering ground. No fluid was recovered. Piping will be excavated and repaired, samples will be taken in affected area to insure area is in compliance with NMOCD guidelines for spills

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations
