Mr. Delgado;

As per our conversation, attached are pictures during the initial clean-up actions.

Actions taken included:

- Immediately upon discovery, the leaking pipeline was isolated
- Multiple vacuum trucks were called to the scene and began removing standing fluid
- A backhoe and other heavy equipment were dispatched to the scene to assist
- Earthen berms were constructed to segregate the impacted area
- The area was fenced to prevent livestock from entering

Thank you,

Amanda N. Trujillo
