Mike I will be out on this location on the 22<sup>nd</sup> of this month @ 10:00am with a mini excavator to dig out samples inside the battery @ 4', 5', and 6'. This spill is being handled by Amber Cannon but she has gotten caught up with other projects so I am going to take these samples for her and she told me that you wanted to be notified when the samples are to be taken. If you have any question or concerns let me know.

Thanks
