If a Watercourse was Impacted, Describe Fully.*				
NA				
Describe Cause of Problem and Remedial Action Taken.*				
Failure of gasket at top of heater treater during a wind storm. Shut well in and repaired leak.				
Describe Area Affected and Cleanup Action Taken.*				
Brush and mesquite to the north and west side of location effected by a light mist. Due to sensitive archeological area, we propose to spray fresh water over effected area from the road. Monitor for new growth during Spring time.				
I hereby certify that the information given above is true and complete to the best of my knowledge, and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
