If a Watercourse was Impacted, Describe Fully.*					
Describe Cause of Problem and Remedial Action Taken.*					
Water tank ran over due to loss of power at the facility. CVE returned power.					
Describe Area Affected and Cleanup Action Taken.*					
Initially 20bbls were released from the water tank and we were able to recover 18bbls with a vacuum truck. The fluids released inside the dike area and measured an area of roughly 5' x 30'. Tetra Tech will sample the spill site area to delineate any possible contamination from the release and we will submit a work plan for approval prior to any significant remediation work.					
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
