## **Continuation on Surface/Pool Commingle oil only for Knoll AOK Federal #4H**

Knoll AOK Federal #4H(not yet drilled)  
Nash Draw/Delaware,SW  
Sec. 3-T24S-R29E  
Fed. Lease #NM-85891  
API #30-015-39353

The battery is located at the Knoll #1. Please see attached plats and site security diagrams.

Identical ownership.

### **Oil Measurement**

Each of the wells will be equipped with continuous metering separators for oil production prior to oil being commingled for sales at the Knoll AOK Federal #1. Total sales/production will be allocated back to each individual well using the metered (daily well tests) volumes. Metered volumes will be compared to total battery volumes daily and monthly for accuracy.

Estimated daily production for the Knoll #1 is 2 bbls, for the Knoll #2H is 26 bbls, for the Knoll #3H is 28 bbls, and for the Knoll #4H is 300 bbls. The average gravity is 44.5

The purpose of the Surface/Pool Commingle of production is in the interest of conservation, economic feasibility, the reduction of environmental impact area, and will not result in reduced royalty or improper measurement of production. Without approval for utilizing existing batteries on adjacent leases, it will become necessary to built separate facilities for this well. This will greatly increase costs and shorten the economic life of the well.
