13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*.

As required by 43 CFR 3162.7-2 and Onshore Oil and Gas Order No.4, Chevron U.S.A. Inc. is requesting approval to amend commingling order PLC-59 to add production from C.P. Falby A #1 in the Penrose Skelly; Grayburg field and pool, and production from the C.P. Falby B #4 in the Cary San Andres field and pool.

Commingled production will be metered at the central tank battery located at Unit Letter K, Section 8, T-22S, & R-37E, Lea county, NM. Production will continue to be allocated to each lease by well tests.

Attached in support of this request is a well list with locations, pool numbers, & API numbers, a table showing oil production volumes, API gravities, sulfur analyses, and monetary values for each of the wells proposed for commingling, a schematic diagram for the subject facility, and a lease plat. Commingling will not reduce the actual commercial value of oil or condensate sold from each pool.
