**Subject:** Challenger State Tank Battery - Fire notification

Mr. Bratcher,

I wanted to notify you of a fire we had at our Challenger State Tank Battery yesterday at around 2:45 p.m. A fire tube gasket failed on a heater treater inside the facility which in turn caused the second heater treater to ignite. We have shut in the producing well and are planning to replace the two 4' x 20' heater with one 6' x 20' heater treater as soon as possible. Michelle will visit the site tomorrow morning for additional information. Please advise if you would like any specific additional information and I can try to get it for you. Also please let me know if you would like a C-141 Report for this fire. Legal description and drive to directions are listed below:

Challenger #1 State #1H  
D-01-25S-29E  
LOT 4  
660FNL  
660FWL  
32.16478 – 103.9445

### Directions

Go south on 285 to Malaga, left on Duarte, right on McDonald through low water crossing approx 7 miles, turn right (s) at SUG Nash Draw comp station, stay on pipeline road, turn right at the fork in road & follow road until it tees then turn right about 3 miles turn right into location.

Thank you,

### **Joshua Russo**

Josh,

A C-141 is required. If there was no fluid release or clean up required, just send it in as Initial and Final.

Thanks,

***Mike Bratcher***
