Mr. Bratcher, attached is a plat with the vertical data for the Apache C-49 SWD. Verticals one and two are on the lease pad and lease road since there is no ground water the area on the pad and lease road I would like to scrape down 6" to 8". The area around vertical 3 is in the pasture and will excavate to 4 ft. below ground surface haul off all contaminated soil and backfill with clean soil.
