NATURE OF RELEASE

Type of Release	Oil	Volume of Release	20bbls	Volume Recovered	19bbls
Source of Release	Oil tank	Date and Hour of Occurrence	06/01/2012	Date and Hour of Discovery	06/01/2012 1:00 p.m.
Was Immediate Notice Given?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input checked="" type="checkbox"/> Not Required				
By Whom?	If YES, To Whom?				
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No				
If YES, Volume Impacting the Watercourse.					

If a Watercourse was Impacted, Describe Fully *

Describe Cause of Problem and Remedial Action Taken. *

A rush of production caused the overflow of an oil tank due to restarting wells after DCP was shut in.

Describe Area Affected and Cleanup Action Taken *

Initially 20bbls of oil was released from the oil tank and we were able to recover 19bbls with a vacuum truck. The entire release was completely contained inside the lined facility walls of the tank battery. All free fluid has been recovered and the contaminated gravel has been removed. Fresh gravel has been added to the facility as necessary. The facility has been returned to its prior condition.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
