NATURE OF RELEASE

Type of Release: Natural Gas/Condensate	Volume of Release: 100 MCF gas and 5 bbls liquid	Volume Recovered: 120 cy of petroleum hydrocarbon contaminated soils
Source of Release: 4" gathering line external corrosion hole	Date and Hour of Occurrence: Unknown	Date and Hour of Discovery: Laboratory analysis confirming groundwater impact received June 19, 2012 at 1430 hours
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Glenn von Gonten and Brandon Powell, NMOCD and Steve Austin, NNEPA	
By Whom? Tami C. Ross, Animas Environmental Services	Date and Hour: June 19, 2012, at 1530 hours	
Was a Watercourse Reached? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No	If YES, Volume Impacting the Watercourse. Unknown. Workplan to delineate area of impact has been submitted to NMOCD and NNEPA on June 22, 2012.	

If a Watercourse was Impacted, Describe Fully. * Groundwater in the Gallegos Wash was encountered at approximately 2.25 feet below ground surface (bgs). Horizontal extent of the dissolved phase plume will be delineated upon approval of the workplan submitted on June 22, 2012.

Describe Cause of Problem and Remedial Action Taken. * June 6 through June 12, 2012, an estimated 120 cy of petroleum hydrocarbon contaminated soil was removed from the Gallegos Wash. Groundwater was encountered at approximately 2.25 feet bgs. A groundwater sample was collected from the base of the excavation and submitted for laboratory analysis. Laboratory results confirmed groundwater impact.

Describe Area Affected and Cleanup Action Taken. The proposed work plan includes installing a minimum of eight sampling points (temporary wells). Soil samples and water samples will be collected from each sampling point and submitted for laboratory analysis. Based on the laboratory results, a remedial action plan for the residual petroleum hydrocarbon contamination will be developed.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
