Describe Cause of Problem and Remedial Action Taken.\* The flow line developed a leak due to external corrosion. A temporary repair clamp was placed on the pipe. Four joints of pipe were replaced between 5/30/12 and 6/14/12.

Describe Area Affected and Cleanup Action Taken.\* Approximately 2000 sq. ft. of pasture land. All of the released fluid soaked into the ground. The spill happened on top of an area previously impacted by at least 2 prior flow line releases. There is also an area in the impact zone that has exposed plastic from a reserve pit location. The release site will be reviewed with the BLM and NMOCD to determine the best course of action. The remediation will comply with the NMOCD and BLM requirements for spills.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
