NATURE OF RELEASE

Type of Release	Oil	Volume of Release	75bbls	Volume Recovered	70bbls
Source of Release	Gun barrel	Date and Hour of Occurrence	06/26/2012	Date and Hour of Discovery	06/26/2012 9:30 a.m.
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Mike Bratcher-OCD			
By Whom?	Michelle Mullins	Date and Hour	06/27/2012 9:27 a.m.		
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

The gun barrel at the Jenkins Water Flood & Tank Battery overflowed due to motor valves that did not open. Electricians have been called out to ensure that the problem with the motor valves has been resolved.

Describe Area Affected and Cleanup Action Taken.*

Initially 75bbbs of oil were released from the gun barrel at the facility and we were able to recover 70bbbs with a vacuum truck. The entire release was contained inside the diked walls of the facility. Tetra Tech will sample the spill site area to delineate any possible contamination from the release and we will present a remediation work plan to the NMOCD/BLM for approval prior to any significant remediation work.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: Northwest Central overflow tank-Immediate Notification

Mr. Bratcher, Mr. Amos, Ms. Gregston:

On 06/25/2012 at approximately 10:15 am, a 10,000 bbl overflow tank was found to be running over. An estimated 100 bbls of produced water and an estimated 700 bbls of oil was released. The tank is inside an unlined dike. Water has been diverted from the overflow tank and rerouted. We will get more details and follow up with a C-141 Report.
