Total gas production and sales will be based on the measurement at the CDP and allocated back to each well based on EFM readings. The DCP's meter #722112 is located at the Yarrow #1.

The ownership is diversified. All owners have been notified and copies of certified receipts and letters are attached.

Estimated daily gas production for the Hemlock #1H is 500 MCF and for the Yarrow #1 gas production is marginal, 0-5 MCF with 1390 BTU.

The proposed commingling is necessary for economic operation of the above referenced leases and will not result in reduced royalty or improper measurement of production.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.

RECEIVED OOD

Total gas production and sales will be based on the measurement at the CDP and allocated back to each well based on EFM readings. The DCP's meter #722112 is located at the Yarrow #1.

The ownership is diversified. All owners have been notified.

Estimated daily gas production for the Hemlock #1H is 500 MCF and for the Yarrow #1 gas production is marginal, 0-5 MCF with 1390 BTU.

The proposed commingling is necessary for economic operation of the above referenced leases and will not result in reduced royalty or improper measurement of production.

Any objection must be filed in writing with the Oil Conservation Division in Santa Fe within 20 days from the date the division receives the application. Application will be sent in conjunction with notification to owners.

If you should have any questions, please give me a call at (575) 748-4200 (direct line).

Sincerely,

Miriam Morales  
Production Analyst
