NATURE OF RELEASE

Type of Release	Crude Oil	Volume of Release	6 bbls	Volume Recovered	2 bbls
Source of Release	Drain valve on pig launcher did not close completely	Date and Hour of Occurrence	09/21/2012	Date and Hour of Discovery	09/21/2012 @ 12:30
Was Immediate Notice Given?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?	N/A		
By Whom?		Date and Hour	N/A		
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

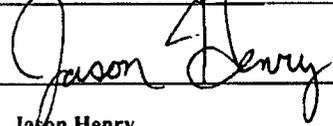

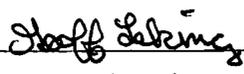

If a Watercourse was Impacted, Describe Fully.*

4w @ 210'

Describe Cause of Problem and Remedial Action Taken.*
During the launching of a pig, a drain valve on the barrel of the pig launcher failed to seat completely resulting in a release of crude oil.

Describe Area Affected and Cleanup Action Taken.*
The released crude resulted in a surface stain that measured approximately 5' x 20'. The depth to groundwater in this area is approximately 210' below ground surface. The impacted area will be remediated per applicable NMOCD guidelines.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
