<b>Was a Watercourse Reached?</b> <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	<b>If YES, Volume Impacting the Watercourse:</b>	

**Depth to water:** ~60 ft  
**If a Watercourse was Impacted, Describe Fully:**

**Describe Cause of Problem and Remedial Action Taken.\*** Release was caused by corrosion of 2 inch nipple near the transition. Approximately 40 bbls of produced water was released with no recovery. An Emergency Response Team arrived at the release area and began continuous abatement of the impacted area.

**Describe Area Affected and Cleanup Action Taken.\*** Approximately 1,400 square feet of area was affected by the release of produced water. Visibly stained soil was excavated and hauled away for disposal at a state approved facility. Soil samples were collected and submitted to Cardinal Laboratories for testing. Upon receiving acceptable results and NMOCD approval, the affected area will be backfilled, and returned to proper conditions.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
