Greetings,

NMOCD District 2 records show three reported produced fluid releases that occurred at the above referenced site. The Form C-141 for the most recent release indicates the date of discovery to be 6/14/12. NMOCD tracking number for this release is **2RP-1184**. A remediation proposal for this release has been requested to be submitted to NMOCD by 7/21/12.

The other two release incidents indicate date of discovery to be 5/9/11 (**2RP-928**) and 8/16/11 (**2RP-879**). I have some email correspondence between BLM and Alamo's environmental contractor indicating some remedial work was likely performed at the site, but do not have record of having received any remediation proposals, analytical data, closure requests, etc. Please advise what the status is regarding these two release incidents.

Thank you,

***Mike Bratcher***
