**ADMINISTRATIVE ORDER DHC-953**

Stephens & Johnson Operating Company  
P.O. Box 2249  
Wichita Falls, TX 76307-2249

Attention: Bob Gilmore

*Weatherly Well No. 7  
Unit G, Section 21, Township 21 South, Range 37 East, NMPM,  
Lea County, New Mexico.  
Tubb Oil & Gas and Drinkard Pools*

Dear Mr. Gilmore:

Reference is made to your recent application for an exception to Rule 303-A of the Division Rules and Regulations to permit the subject well to commingle production from both pools in the wellbore.

It appearing that the subject well qualifies for approval for such exception pursuant to the provisions of Rule 303-C, and that reservoir damage or waste will not result from such downhole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described above and any Division Order which authorized the dual completion and required separation of the two zones is hereby placed in abeyance.

In accordance with the provisions of Rule 303-C-4., total commingled oil production from the subject well shall not exceed 40 barrels per day, and total water production shall not exceed 80 barrels per day. The maximum amount of gas which may be produced daily from the well shall be determined by multiplying 6000 by the top unit allowable for the Drinkard Pool.

Assignment of allowable to the well and allocation of production from the well shall be on the following basis:

Tubb Oil and Gas Pools	Oil	50%	Gas	78%
Drinkard	Oil	50%	Gas	22%

FURTHER: The operator shall notify the Hobbs District Office of the Division upon implementation of the commingling process.

Pursuant to Rule 303-C-5, the commingling authority granted by the order may be rescinded by the Division Director if, in his opinion, conservation is not being best served by such commingling.

Approved at Santa Fe, New Mexico on this 1st day of December, 1993.
