Surface Commingling Notice  
Burnham Gas Com 1E  
Burnham Gas Com B FC  
Burnham Gas Com  
Section 12, T29S, R13W  
San Juan County, New Mexico

This letter serves to advise you, as a royalty interest owner in one or more of the subject leases, that Amoco Production Company is applying for New Mexico Oil Conservation Division approval to surface commingle production from the above named leases. Implementation will consist of surface commingling Basin Dakota production will be from the Burnham Gas Com 1E, Basin Fruitland Coal production will be from the Burnham Gas Com B FC 1 and Kutz Pictured Cliffs West production will be from the Burnham Gas Com A 1.

The liquid production will be separated and stored on each lease prior to metering. Gas production from each well will be individually metered prior to surface commingling. After metering the gas will then be commingled prior to compression and entrance into the sales line. A Site Facility Schematic is attached for your reference

Commingled production will be measured and determined in accordance with applicable conservation rules and the result of this surface commingling will not reduce the commercial value of the commingled produced when compared to the sum of the individual products.

Should you have any objection to this application, you must notify the New Mexico Oil Conservation Division, Energy and Minerals Department, P. O. Box 2088, Santa Fe, New Mexico 87501, in writing within 20 days of receipt of this letter.

Yours very truly
