ADMINISTRATIVE APPLICATION CHECKLIST

THIS CHECKLIST IS MANDATORY FOR ALL ADMINISTRATIVE APPLICATIONS FOR EXCEPTIONS TO DIVISION RULES AND REGULATIONS WHICH REQUIRE PROCESSING AT THE DIVISION LEVEL IN SANTA FE

Application Acronyms:

- [NSL-Non-Standard Location] [NSP-Non-Standard Proration Unit] [SD-Simultaneous Dedication]
- [DHC-Downhole Commingling] [CTB-Lease Commingling] [PLC-Pool/Lease Commingling]
- [PC-Pool Commingling] [OLS - Off-Lease Storage] [OLM-Off-Lease Measurement]
- [WFX-Waterflood Expansion] [PMX-Pressure Maintenance Expansion]
- [SWD-Salt Water Disposal] [IPI-Injection Pressure Increase]
- [EOR-Qualified Enhanced Oil Recovery Certification] [PPR-Positive Production Response]

[1] **TYPE OF APPLICATION** - Check Those Which Apply for [A]

- [A] Location - Spacing Unit - Simultaneous Dedication
 NSL NSP SD

Check One Only for [B] or [C]

- [B] Commingling - Storage - Measurement
 DHC CTB PLC PC OLS OLM

- [C] Injection - Disposal - Pressure Increase - Enhanced Oil Recovery
 WFX PMX SWD IPI EOR PPR

[D] Other: Specify _____

[2] **NOTIFICATION REQUIRED TO:** - Check Those Which Apply, or Does Not Apply

- [A] Working, Royalty or Overriding Royalty Interest Owners
- [B] Offset Operators, Leaseholders or Surface Owner
- [C] Application is One Which Requires Published Legal Notice
- [D] Notification and/or Concurrent Approval by BLM or SLO
U.S. Bureau of Land Management - Commissioner of Public Lands, State Land Office
- [E] For all of the above, Proof of Notification or Publication is Attached, and/or,
- [F] Waivers are Attached

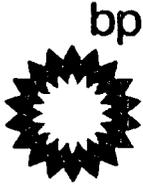

[3] **SUBMIT ACCURATE AND COMPLETE INFORMATION REQUIRED TO PROCESS THE TYPE OF APPLICATION INDICATED ABOVE.**

[4] **CERTIFICATION:** I hereby certify that the information submitted with this application for administrative approval is **accurate and complete** to the best of my knowledge. I also understand that **no action** will be taken on this application until the required information and notifications are submitted to the Division.

Note: Statement must be completed by an individual with managerial and/or supervisory capacity.

Application for Authority to Inject
Washington 33 State Lease Well #12
Artesia Pool, Eddy County, New Mexico

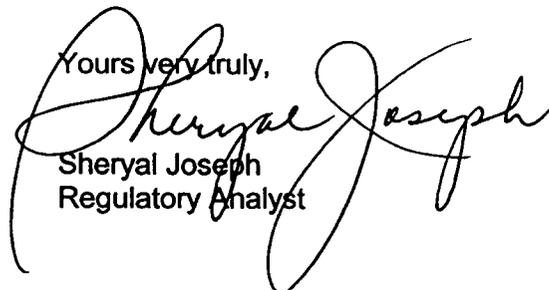

Dear Mr. Jones,

Permission is requested to inject water in the Washington 33 State Lease, Artesia Pool, Eddy County, New Mexico, using the Washington 33 State Well No. 12. Attached is our application for authority to inject, a location map identifying all wells and leases within two miles of the injection well, a table of completion data on all wells of public record in the area of review, a wellbore schematic for each plugged well, a statement on proposed well operation, a statement on geology, a statement on the proposed injection well stimulation program, and chemical analysis of nearby fresh water. In addition, an injection well data sheet and proof of notice that a copy of the application has been furnished to the surface owner and offset operators is attached.

The Washington 33 State Well No.12 is currently perforated selectively from 1449' to 2928', in all known productive horizons of the Artesia Pool. Water injection will be through 2 3/8" PCID tubing with tension packer set within 100' of the injection interval. The injection water will be produced water from the Artesia and Empire Abo Pools. The average injection rate will be 500 BWPD and the injection pressure will be limited to 0.2 psi/foot of depth to the uppermost injection perforation.

Your favorable consideration in this matter is respectfully requested. If you have any questions or need any additional data, please contact Mr. Bill Simpson at 281-366-0333. If this application cannot be handled administratively, please set for a hearing at the earliest possible time.

Yours very truly,

Sheryal Joseph
Regulatory Analyst

C: BRYAN ARRIANT/OCD-Artesia Office

APPLICATION FOR AUTHORIZATION TO INJECT

- I. PURPOSE: Secondary Recovery Pressure Maintenance Disposal Storage
Application qualifies for administrative approval? Yes No
- II. OPERATOR: BP America Production Company
ADDRESS: 501 Westlake Park Blvd, Rm 6.138
CONTACT PARTY: Sheryal Joseph PHONE: (281) 366-4493
- III. WELL DATA: Complete the data required on the reverse side of this form for each well proposed for injection.
Additional sheets may be attached if necessary.
- IV. Is this an expansion of an existing project? Yes No
If yes, give the Division order number authorizing the project: _____
- V. Attach a map that identifies all wells and leases within two miles of any proposed injection well with a one-half mile radius circle drawn around each proposed injection well. This circle identifies the well's area of review.
- VI. Attach a tabulation of data on all wells of public record within the area of review which penetrate the proposed injection zone. Such data shall include a description of each well's type, construction, date drilled, location, depth, record of completion, and a schematic of any plugged well illustrating all plugging detail.
- VII. Attach data on the proposed operation, including:
1. Proposed average and maximum daily rate and volume of fluids to be injected;
 2. Whether the system is open or closed;
 3. Proposed average and maximum injection pressure;
 4. Sources and an appropriate analysis of injection fluid and compatibility with the receiving formation if other than reinjected produced water.
 5. If injection is for disposal purposes into a zone not productive of oil or gas at or within one mile of the proposed well, attach a chemical analysis of the disposal zone formation water (may be measured or inferred from existing literature, studies, nearby wells, etc.).
- *VIII. Attach appropriate geologic data on the injection zone including appropriate lithologic detail, geologic name, thickness, and depth. Give the geologic name, and depth to bottom of all underground sources of drinking water (aquifers containing waters with total dissolved solids concentrations of 10,000 mg/l or less) overlying the proposed injection zone as well as any such sources known to be immediately underlying the injection interval.
- IX. Describe the proposed stimulation program, if any.
- *X. Attach appropriate logging and test data on the well. (If well logs have been filed with the Division, they need not be resubmitted).
- *XI. Attach a chemical analysis of fresh water from two or more fresh water wells (if available and producing) within one mile of any injection or disposal well showing location of wells and dates samples were taken.
- XII. Applicants for disposal wells must make an affirmative statement that they have examined available geologic and engineering data and find no evidence of open faults or any other hydrologic connection between the disposal zone and any underground sources of drinking water.
- XIII. Applicants must complete the "Proof of Notice" section on the reverse side of this form.
- XIV. Certification: I hereby certify that the information submitted with this application is true and correct to the best of my knowledge and belief.
- NAME: Sheryal Joseph TITLE: Regulatory Analyst
SIGNATURE: Sheryal Joseph DATE: 1-24-05
- * If the information required under Sections VI, VIII, X, and XI above has been previously submitted, it need not be resubmitted. Please show the date and circumstances of the earlier submittal: X. Log and test data submitted with well completion in 1998.

III. WELL DATA

A. The following well data must be submitted for each injection well covered by this application. The data must be both in tabular and schematic form and shall include:

- (1) Lease name; Well No.; Location by Section, Township and Range; and footage location within the section.
- (2) Each casing string used with its size, setting depth, sacks of cement used, hole size, top of cement, and how such top was determined.
- (3) A description of the tubing to be used including its size, lining material, and setting depth.
- (4) The name, model, and setting depth of the packer used or a description of any other seal system or assembly used.

Division District Offices have supplies of Well Data Sheets which may be used or which may be used as models for this purpose. Applicants for several identical wells may submit a "typical data sheet" rather than submitting the data for each well.

B. The following must be submitted for each injection well covered by this application. All items must be addressed for the initial well. Responses for additional wells need be shown only when different. Information shown on schematics need not be repeated.

- (1) The name of the injection formation and, if applicable, the field or pool name.
- (2) The injection interval and whether it is perforated or open-hole.
- (3) State if the well was drilled for injection or, if not, the original purpose of the well.
- (4) Give the depths of any other perforated intervals and detail on the sacks of cement or bridge plugs used to seal off such perforations.
- (5) Give the depth to and the name of the next higher and next lower oil or gas zone in the area of the well, if any.

XIV. PROOF OF NOTICE

All applicants must furnish proof that a copy of the application has been furnished, by certified or registered mail, to the owner of the surface of the land on which the well is to be located and to each leasehold operator within one-half mile of the well location.

Where an application is subject to administrative approval, a proof of publication must be submitted. Such proof shall consist of a copy of the legal advertisement, which was published in the county in which the well is located. The contents of such advertisement must include:

- (1) The name, address, phone number, and contact party for the applicant;
- (2) The intended purpose of the injection well; with the exact location of single wells or the Section, Township, and Range location of multiple wells;
- (3) The formation name and depth with expected maximum injection rates and pressures; and,
- (4) A notation that interested parties must file objections or requests for hearing with the Oil Conservation Division, 2040 South Pacheco, Santa Fe, New Mexico 87505, within 15 days.

NO ACTION WILL BE TAKEN ON THE APPLICATION UNTIL PROPER PROOF OF NOTICE HAS BEEN SUBMITTED.

NOTICE: Surface owners or offset operators must file any objections or requests for hearing of administrative applications within 15 days from the date this application was mailed to them.

Total Depth: 4000'

Injection Interval

Perforated 1449 feet to 2928 feet

(Perforated or Open Hole; indicate which)

INJECTION WELL DATA SHEET

Tubing Size: 2-3/8" Lining Material: PCID

Type of Packer: retrievable tension packer

Packer Setting Depth: 1400'

Other Type of Tubing/Casing Seal (if applicable): _____

Additional Data

1. Is this a new well drilled for injection? Yes X No
If no, for what purpose was the well originally drilled? production

2. Name of the Injection Formation: Queen, Grayburg, and San Andres

3. Name of Field or Pool (if applicable): Artesia Queen-Grayburg-San Andres Pool

4. Has the well ever been perforated in any other zone(s)? List all such perforated intervals and give plugging detail, i.e. sacks of cement or plug(s) used. Yes,

Yeso perforated from 3652' -3786' closed by CIBP @ 3557'

5. Give the name and depths of any oil or gas zones underlying or overlying the proposed injection zone in this area: 7 Rivers (695') above and Yeso (3618') below

Proposed Operation
Washington 33 State Lease Waterflood
Reference: State Form C-108 Item VII, Attachment.

This application, for one injection well, is intended to determine the viability of injecting into the multiple layers of the Artesia Pool reservoir simultaneously.

1. Proposed Injection Rate:

The maximum daily injection rate is expected to be 1000 BWPD, with the average daily injection rate expected to be 500 BWPD.

2. System configuration:

The injection system will be closed.

3. Proposed injection pressure:

The maximum injection pressure will be limited to 0.2 psi/foot of depth to the uppermost injection perforation. Therefore, the system will be controlled such that maximum injection pressure will not exceed 290 psig. The maximum and average injection pressures are expected to be the same.

If necessary, a step rate test will be performed and request made to the Oil Conservation Division for higher injection pressure.

4. Sources of injection fluids:

All of the produced water will be reinjected. In addition, produced water from the SDX Resources operated North West Artesia Unit and the BP America operated Empire Abo Unit will be utilized as make up water for the injection project. Water analysis for the respective injection waters are attached and a compatibility analysis for the Abo produced water is included. As shown in analysis, a mixture of at least 30:60 Empire to Washington water will result in an elimination of sulfate scaling tendencies. The degradation of carbonate scaling tendencies is felt to be within acceptable limits for this acid soluble scale.

Injection Zone Geology
Washington 33 State Lease Waterflood
Reference: State Form C-108 Item VIII, Attachment.

Formation tops as picked in the Washington 33 #12 well:

Formation	Depth (MD)	Thickness
Rustler	475'	75'
Yates	550'	125'
Seven Rivers	675'	585'
Queen	1260'	435'
Grayburg	1695'	305'
San Andres	2000'	1520'
Glorieta	3520'	110'
Paddock	3630' (= Top Yeso)	
TD	4000'	

A bridge plug at 3557' isolates the Paddock. The two open perforated intervals, 1449' to 2107' and 2372' to 2928', are within the Queen, Grayburg and San Andres formations. In this area the Queen is mainly limestone, and the Grayburg and San Andres are mainly dolomite. Rare, thin clastic intervals of sand and shale are scattered through the Queen, Grayburg and San Andres.

Fresh water is found in the Triassic Sand. The base of the water is estimated to be 350 feet in this area of the Field. There are no known fresh water sands located below the injection interval.

Injection Well Stimulation Program
Washington 33 State Lease Waterflood
Reference: State Form C-108 Item IX, Attachment.

The Washington 33 State Lease Well #12 was original stimulated as detailed in C-105 Well Completion Reports or C-103 Sundry Notices found in the Commission file. There are no present plans to restimulate the well.

Fresh Water Data
Washington 33 State Lease Waterflood
Reference: State Form C-108 Item XI, Attachment.

Attached are water analyses of the closest known active fresh water wells. These wells are located on the area of review map and range from 1.1 to 1.4 miles in distance to the proposed injection well.

100%	0%	0.14	1.50	79.3	-0.11		-0.09		N/A		N/A	

Note 1: The amount of scale indicates the severity of the problem. The saturation index (SI) indicates how difficult it is to control the problem.

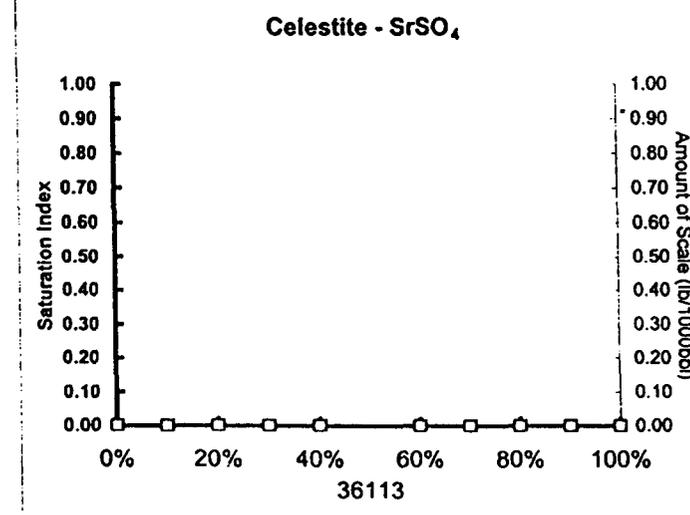

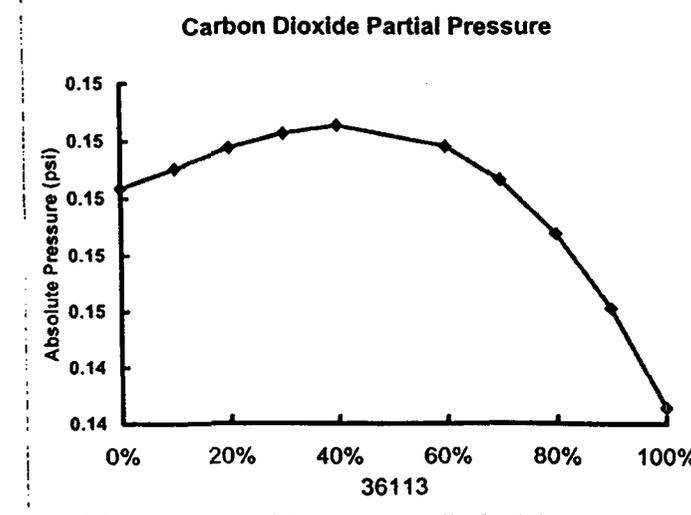

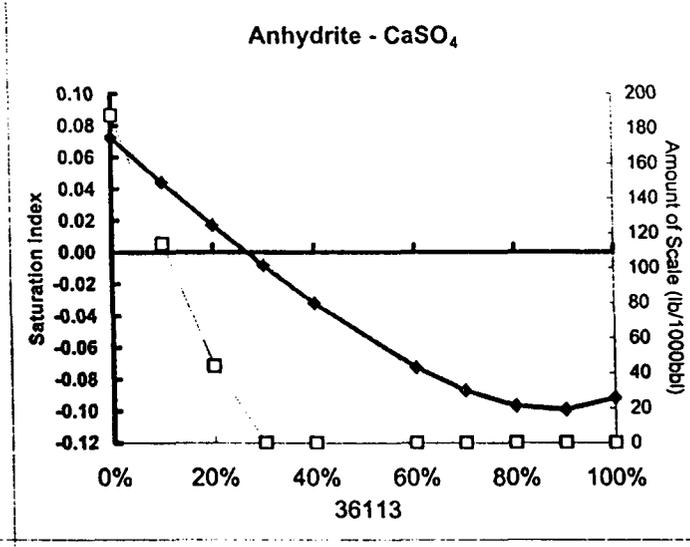

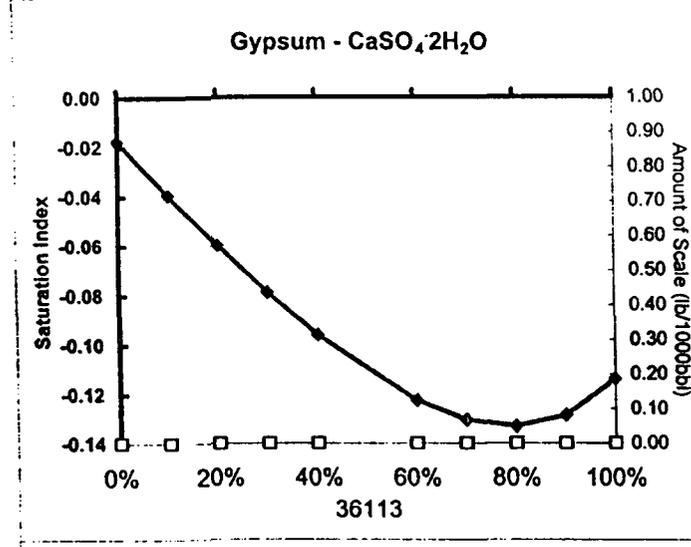

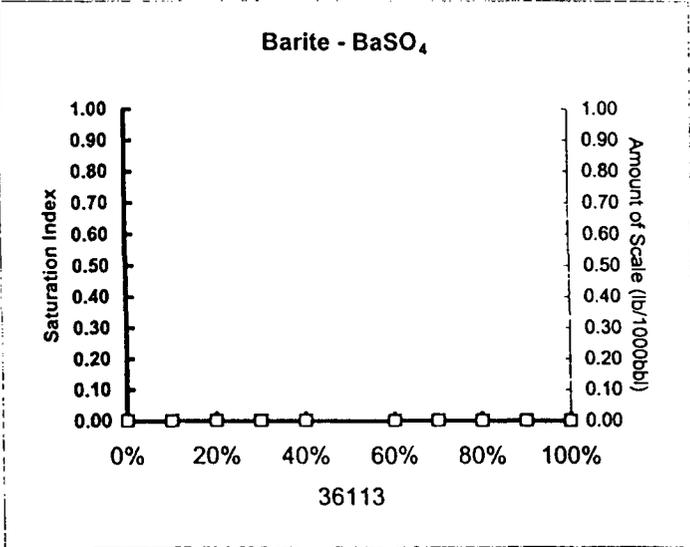

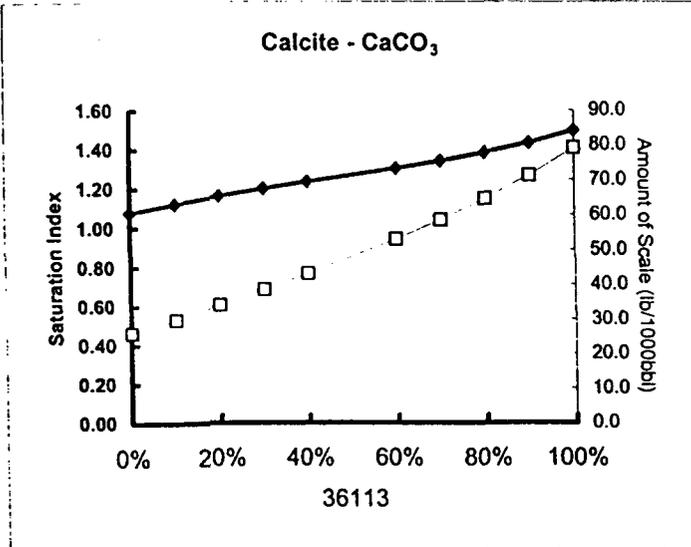

Note 2: Precipitation of each scale is considered separately. Total scale will be less than the sum of the amounts of the five scales.

Note 3: The reported CO₂ pressure is the calculated CO₂ fugacity. It is usually nearly the same as the CO₂ partial pressure.

LEGAL NOTICE

LEGAL NOTICE
BP America Production Company proposes to file form C-108 (Application For Authorization To Inject) with the New Mexico Oil Conservation Division seeking administrative approval for a saltwater injection well. The proposed well, the Washington 33 State Well #12 is located 2432' FNL & 2270' FEL, Section 33 Township 17 South, Range 28 East, Eddy County, New Mexico. The well will inject water produced from oil and gas wells into the Artesia (Queen-Grayburg-San Andres) Pool formation at 1257' to 2962' at a maximum rate of 1000 barrels of water per day and a maximum pressure of 1500 psig. Interested parties, opposing the action, must file objections or requests for hearing with the Oil Conservation Division, 1220 South St. Francis Dr., Santa Fe, NM 87505, within 15 days. Additional information can be obtained by contacting BP America Production Company, P.O. Box 3092 Houston, TX

**Application for Authority to Inject
Washington 33 State Lease Well #12
Artesia Pool, Eddy County, New Mexico**

Gentlemen / Ladies:

BP America Production Company is making application to the State of New Mexico Energy, Minerals, and Natural Resources Department, Oil Conservation Division, for permission to inject produced water into the Washington 33 State Lease Well No. 12, Artesia Pool, Eddy County, New Mexico.

Attached you will find a copy of the application being filed with the Oil Conservation Division requesting their approval of the project.

If you have any questions or need any additional information, please do not hesitate to contact Mr. Bill Simpson at 281-366-0333.

Yours very truly,

Subject: Mae Curry Well No. 1

Will,

The Mae Curry Well No. 1 is now planned for abandonment. The project costs have exceeded our economic threshold, and presently, we plan to continue trucking our water.

Sorry we didn't get back to you sooner with this information.

We tried to step rate test the Washington 33 State Well #12 last week, but lost our logging tools in the hole before we were completed. We have fished the tools and plan to try again in early November. Everyone is so short handed, that you have to wait for windows of opportunity to conduct field work.

Regards,

Bill

Subject: BP's SWD Application: Washington 33 State Well #12 30-015-30348

Hello Bryan:
Please let me know what you think about this application.

I also have a question for you. The Area of Review for this well has a few wells that have communication behind pipe or in plugged wellbores from the 7rivers to the Queen. In other words, water injected into the interval they are proposing can travel in the Queen laterally to these wells and then up into the 7 rivers.

Is this a problem? Is there any 7 rivers producing zones? It looks like this is a sandstone with high porosity. But it may not be and may be tight and water bearing. I don't know about the oil/gas shows or the drilltimes.

If this well is successful, they will be proposing many more in this area as part of a waterflood - and maybe having to re-plug lots of wells if the 7rvrs is a valid "protectable" formation.

William V. Jones Engineering Bureau Oil Conservation Division Santa Fe

BP'S SWD Application: Washington 33 State # 12 (API# 30-015-30348)

April 21, 2005

Will, to answer to your inquiries about the above subject well, please review the data and information that I found in the area of review (AOR) and immediately outside:

In the circled AOR, there is no reported production of oil and gas above the Queen in the Tansill, Yates or Seven-Rivers formations from wells previously drilled.

However there are (2) oil pools that produce hydrocarbons from the Yates-Seven Rivers to the northeast and to the west of the proposed injection well.

To the west lies the far southeastern boundaries of the Empire; Yates-Seven Rivers Oil Pool. This pool covers in part all of section 30 and the N/2 of section 31.

To the northeast, lies the Empire: Yates; Seven-Rivers Oil Pool. The southern most boundaries of this pool cover parts of sections: 27,28 and the W/2of the NE/4 of section 34.

Located in N-28-17-28, Marbob Energy Corporation has 2 wells, which produce or had produced oil from the Seven-Rivers. (30-015-01596 and 30-015-21463) The perfd intervals are at a depth of 706-728'. There is reported to be approximately 115 wells that have produced hydrocarbons from the entire Empire; Yates-seven Rivers Oil Pool.

The oil wells I noted are ones nearest to the AOR, which is a little more than a ½ mile away.

As you can see the vertical distance between the proposed injection interval and the producing interval of Marbob's well is @721'.

In between this interval is the Seven Rivers formation, which is mostly composed of dolomite, the Bowers formation and Queen formation, which is mostly composed of sand, sandy dolomites, dolomite and dolomitic limestones.

As far as communication of fluids migrating from the Queen to the Seven-Rivers, it is difficult for me to give you an educated guess.

You possibly could obtain from recent wells drilled in this area a copy of drill rates from the operator, providing they either mud-logged these intervals or from drillers log records. You may of course also review offset porosity logs to try and determine if there may be communication from the proposed injection interval both laterally and vertically. I myself do not have the experience to make a valid determination. Give me a call or e-mail if you have any questions.

Washington "33" State #12
2432' FNL - 2270' FEL
Section 33, T-17S, R-28E
Eddy County, New Mexico**

Dear Mr. Jones:

Enclosed is a copy of the legal notice from the Artesia Daily Press. Based on the information contained in the notice, Marbob Energy Corporation, by this letter, is objecting to the proposal as outlined. We believe that we fall within the radius of review and should be notified by BP. We contacted Bill Simpson with BP and he indicated they had not sent out the package to offset operators yet. When we receive the package, we will review it to determine if we can withdraw our objection.

If you have any questions regarding this, please contact me.

Sincerely,

Raye Miller
