**New Mexico Oil Conservation Division  
Attn: Michael Stogner  
2040 South Pacheco  
Santa Fe, NM 87505**

Dear Mr. Stogner:

Chevron Corporation respectfully requests administrative approval to Simultaneously Dedicate the allowable for the Monument Tubb to the CH Weir A #14 and the CH Weir A #7.

Chevron is planning to recomplete the CH Weir A #7 as a gas well in the Tubb formation. The subject well was originally drilled and triple completed in the Drinkard, Glorieta, and Eumont in 1961. The Drinkard and Glorieta were then downhole commingled and the Eumont perms cement squeezed in 1975. The Glorieta zone was squeezed off and the Blinebry opened in 1995. The well is currently SI due to uneconomic production. It is proposed to recomplete as a gas producer in the Tubb formation in order to return the well to economic production in the Monument Tubb pool.

Upon completion, the subject well would be simultaneously dedicated with the CH Weir A #14 on an 80 acre proration unit.

Chevron is the offset operator on all sides of this 80 acre proration unit. Therefore, no notifications to other operators have been made.
