Describe Cause of Problem and Remedial Action Taken.*					
The gun barrel tank overflowed at the SWD facility do to the fact that the alarm has not been installed yet. Alarms will be installed on the oil tanks to prevent re-occurrence.					
Describe Area Affected and Cleanup Action Taken.*					
Initially 15bbls were released from the overflowed gun barrel and we were able to recover 12bbls with a vacuum truck. The fluid ran into the lined facility and was contained by the dike walls. All free fluid has been recovered and the contaminated gravel has been removed. The tanks and the liner have been steam cleaned and fresh gravel has been replaced into the SWD. The facility has been returned to its prior condition.					
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
