1.0 INTRODUCTION

This Annual Groundwater Monitoring Report presents groundwater data collected during the 2010 reporting period at the G.L. Erwin "A & B" Federal NCT-2 Tank Battery (hereafter referred to as the "Site"). On February 22-25 and July 26-28, 2010, Conestoga-Rovers & Associates (CRA) conducted the semi-annual groundwater monitoring events on behalf of Chevron Environmental Management Company (CEMC), as successor to Texaco Exploration and Production, Inc. (Texaco).

The Site is located on Lea County Road J4, approximately 3 miles northeast of Jal, New Mexico in the southwest quarter (SW/4) of the southeast quarter (SE/4), Section 35, Township 24 South, Range 37 East, Lea County, New Mexico. The Site's coordinates are latitude N 32° 10' 11.9" and longitude W 103° 07' 46.9". The Site is relatively flat and improved with bermed above ground storage tanks (ASTs), caliche roadways, and oil and gas production equipment. The production equipment includes pipelines, ASTs of various capacities and active production wells. Land use in the vicinity of the Site includes rangeland with indigenous grass, livestock ranching, oil and gas production. The topography slopes gently southeast toward Monument Draw located approximately 1.5 miles east of the Site.

Site assessment activities were initiated in 1993. In September 1993, Environmental Spill Control, Inc. (ESCI) of Hobbs, New Mexico performed a subsurface investigation in and around an unlined earthen emergency which produced a water overflow pit that was located adjacent to the west edge of the Site. During the investigation, 16 boreholes ranging from 30 to 100 feet below ground surface (bgs) were installed to evaluate soil and groundwater at the Site. Analytical results indicated hydrocarbon impacts to the soil and chloride impacts to the groundwater. In September 1994, ESCI excavated the former pit to approximately 62 feet bgs and removed approximately 40,000 cubic yards of hydrocarbon-affected soil. The excavation was lined from 62.5 feet up to 55.0 feet with a mixture of clean sand and clay and was backfilled with clean soil to the surface. ESCI submitted the pit closure report to Texaco in October 1994.

In February 1995, Texaco submitted a work plan to the New Mexico Oil Conservation Division (NMOCD) to assess affected groundwater at the Site. On March 28, 1995, the work plan was conditionally approved by the NMOCD. Two monitoring wells (WMW and SWMW) were installed and sampled in 1997. Analytical results demonstrated groundwater chloride concentrations were at or above the New Mexico Water Quality Control Commission (NMWQCC) Standards. In January 1998, Highlander Environmental Corp. (Highlander) performed an electromagnetic (EM-34) terrain conductivity survey. Additionally, Highlander installed eight monitoring wells (MW-1 thru MW-8) from February 1998 to January 1999 in order to further evaluate the extent of affected groundwater.

Texaco submitted a corrective action proposal plan to the New Mexico Office of the State Engineer (NMOSE) to recover groundwater from the recovery well (RW-1). From September 2001 to October 2003, nine additional monitor wells were installed under the direction of Larson and Associates, Inc. (LA). On September 9, 2004, the New Mexico State Engineer Office issued Permit CP 00886 to Divert Underground Waters from recovery well RW-1. Monitor wells (MW-18 thru MW-20) were installed under the direction of LA in November 2004. A total fluids groundwater recovery system was installed at RW-1 under CRA's direct supervision in September 2006. At the request of the NMOCD, two additional groundwater monitoring wells (MW-21 and MW-22) were installed at the Site on November 19, 2007 to further evaluate the extent of affected groundwater. Currently, the Site is monitored semi-annually by CRA.

2.0 REGULATORY FRAMEWORK

The NMOCD guidelines require groundwater to be analyzed for constituents of concern (COC) as defined by the New Mexico Water Quality Control Commission (NMWQCC) standards. The NMWQCC regulations provide Human Health Standards for Groundwater. The COCs in affected groundwater at the Site are chlorides, fluorides, nitrates, sulfates and total dissolved solids (TDS). Groundwater analytical results for COC analytes were compared to the NMWQCC standards shown in the following table:

Analyte	NMWQCC Standard for Groundwater (mg/L)
Fluoride[1]	1.6
Nitrate (NO_3 as N)[1]	10
Chloride[2]	250
Sulfate (SO_4)[2]	600
Total Dissolved Solids (TDS)[2]	1,000

Notes:
1) [1]NMWQCC Human Health Standards per NMAC 20.6.2.3103A
2) [2]NMWQCC Other Standards for Domestic Water Supply per NMAC 20.6.2.3103B

3.0 2010 GROUNDWATER MONITORING

Currently, groundwater at the Site is monitored semi-annually with a network of 26 wells (MW-1 through MW-22, West monitoring well, Southwest monitoring well, RW-1 & WW-1) (FIGURE 2). CRA performed ground water sampling events on February 22-25 and July 26-28, 2010 at the Site.

Prior to purging the monitor wells, static fluid levels were measured with an electric interface probe to the nearest hundredth of a foot. After recording fluid levels, the wells were handbailed and purged of three casing volumes of groundwater. Water quality field parameters of pH, temperature and conductivity were recorded during purging. All non-disposable groundwater sampling equipment was decontaminated with a soap (Liquinox®) and potable water wash, a potable water rinse and a final de-ionized water rinse. Subsequent to the purging, groundwater samples were collected with new disposable PVC bailers. Laboratory supplied sample containers were filled directly from the bailers.

The groundwater samples were placed on ice in insulated coolers and chilled to a temperature of approximately 4°C (40°F). The coolers were sealed for shipment and proper chain-of-custody documentation accompanied the samples to ALS Laboratory Group (ALS) for analysis of major cations, anions and TDS by Environmental Protection Agency (EPA) Methods E300.0 and SW6020, SM 2320B, and M2540C (APPENDIX A). The fluids recovered during the sampling events were containerized and subsequently disposed of at an OCD-permitted salt water disposal (SWD) facility by Nabors.

3.1 POTENTIOMETRIC SURFACE AND GRADIENT

Groundwater elevation data are presented in TABLE I and generally fall within historical ranges. Groundwater gradient maps for February and July 2010 are presented in FIGURES 3 and 4. Depth to groundwater ranged from 59.35 feet to 80.35 feet below top of casing on February 22, 2010 and from 59.72 feet to 80.39 feet below top of casing on July 26, 2010. Groundwater flow at the Site is to the southeast at an average gradient of 0.012-ft/ft.

3.2 ANALYTICAL RESULTS

The 2010 Analytical results generally fall within historical ranges, and are summarized in Table II. Isopleth maps of the chloride concentrations for February and July 2010 groundwater monitoring events are presented as FIGURES 6 & 7.

All wells sampled during the February and July 2010 monitoring events had at least one COC (Chloride, Fluoride, Nitrate-N, Sulfate or Total Dissolved Solids) that exceeded NMWQCC standards except WW-1 which did not exceed any standards in the February event and was not sampled in the July event. These results are presented as FIGURE 5. Monitoring wells MW-11 and MW-18 were dry and were not sampled in either event. The West and Southwest monitoring wells were only sampled during the July event.

Groundwater COCs detected above the NMWQCC standards are highlighted in TABLE II and are listed below:

- Chloride was detected at concentrations above the NMWQCC standard (250 mg/L) in twenty wells sampled in the February 2010 event and in twenty-one wells in the July 2010 sampling event;

- Fluoride was detected at concentrations above the NMWQCC standard (1.60 mg/L) in six wells sampled in the February 2010 event and in seven wells in the July 2010 sampling event;

- Sulfate was detected at concentrations above the NMWQCC standard (600 mg/L) in two wells sampled in the February 2010 event and in one well in the July 2010 sampling event; and

- Total Dissolved Solids were detected at concentrations above the NMWQCC standard (1,000mg/L) in twenty wells sampled in the February 2010 event and in twenty-one wells in the July 2010 sampling event.

4.0 QUALITY ASSURANCE

One duplicate sample was collected during the February 2010 sampling event, and two duplicate samples were collected during the July 2010 sampling events. Duplicate concentrations did not exhibit significant deviations for constituents analyzed. Copies of the certified analytical reports and chain-of-custody documentation are attached in APPENDIX A.

5.0 CORRECTIVE ACTION

Excluding brief periods for routine maintenance, the groundwater recovery system in RW-1 operated continuously from January to December 2010.

Operation and maintenance (O&M) activities were performed on a weekly basis.

In 2010, approximately 4,648.5 bbls were recovered from RW-1 and 11,894 bbls total have been recovered from RW-1 since the system was installed in September 2006.

Groundwater pumping record reports for RW-1 were submitted quarterly to the NMOSE in accordance to permit requirements.

6.0 SUMMARY

Based on historical data review and groundwater monitoring activities performed at the Site, CRA presents the following summary:

- Groundwater at the Site is monitored semi-annually with a network of 26 wells (MW-1 through MW-22, West monitoring well, Southwest monitoring well, RW-1 & WW-1);

- Groundwater elevation data are presented in TABLE I and generally fall within historical ranges. Groundwater gradient maps for February and July 2010 are presented in FIGURES 3 and 4. Depth to groundwater ranged from 59.35 feet to 80.35 feet below top of casing on February 22, 2010 and from 59.72 feet to 80.39 feet below top of casing on July 26, 2010. Groundwater flow at the Site is to the southeast at an average gradient of 0.012-ft/ft;

- The 2010 analytical results generally fall within historical ranges, and are summarized in TABLE II. All wells sampled during the February and July 2010 monitoring events had at least one COC (Chloride, Fluoride, Nitrate-N, Sulfate or Total Dissolved Solids) that exceeded NMWQCC standards except WW-1;

- Excluding brief periods for routine maintenance, the groundwater recovery system in RW-1 operated continuously from January to December 2010. Operation and maintenance (O&M) activities were performed on a weekly basis;
- In 2010, approximately 4,648.5 bbls were recovered from RW-1 and 11,894 bbls total have been recovered from RW-1 since the system was installed in September 2006; and

- Groundwater pumping record reports for RW-1 were submitted quarterly to the NMOSE in accordance to permit requirements.

7.0 PLANNED ACTIVITIES

Planned activities at the G.L. Erwin "A & B" Federal NCT-2 Tank Battery include:

- Continue to perform semi-annual groundwater monitoring and sampling events in 2011;
- Continue groundwater recovery from RW-1 in accordance to permit requirements;
- Submit groundwater pumping record reports for RW-1 quarterly to the NMOSE in accordance to permit requirements; and
- Installation of two monitor wells for the purpose of chloride plume delineation at the site.

All of Which is Respectfully Submitted,
CONESTOGA-ROVERS & ASSOCIATES

Notes:

1. mg/L: Milligrams per liter
2. <: Concentration below test method detectin limit
3. - -: No data available
4. RW: Recovery well
5. All analyses prior to 10/14/02 conducted by TraceAnalysis, Inc., Lubbock, TX
6. Analyses from 10/14/02 conducted by Environmental Lab of Texas, Odessa, TX
7. Analyses from 5/30/03 and following conducted by Trace Analysis Inc., Lubbock, TX
8. Analyses from 8/24/06 and 8/25/06, conducted by Pace Analytical, St. Rose, LA and Greenbay, WI Laboratories
9. Highlight: Result exceeds NMWQCC standard
10. **Bold** indicates laboratory detection
11. WW: Water well

Re: G.L. Erwin - 039124 Work Order: **1002698**

Dear Patricia,

ALS Laboratory Group received 25 samples on 25-Feb-2010 through 26-Feb-2010 for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Laboratory Group and for only the analyses requested. Results are expressed as "as received" unless otherwise noted.

QC sample results for this data met EPA or laboratory specifications except as noted in the Case Narrative or as noted with qualifiers in the QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained by ALS Laboratory Group. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 53.

If you have any questions regarding this report, please feel free to call me.

Sincerely,

Electronically approved by: Glenda H. Ramos

Hector Coronado
Project Manager

Certificate No: TX: T104704231-09-1

Case Narrative

Batch 41334, Metals, (sample West-MW), MS/MSD recoveries were outside the control limits.

Batch 41360, Metals, MS/MSD is for an unrelated sample.

Batch R87583, Anions, (sample Southwest-MW), MS/MSD recoveries were outside the control limits for Sulfate.

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
M	Manually integrated, see raw data for justification
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitaion Limit
SD	Serial Dilution
SDL	Sample Detection Limit
TRRP	Texas Risk Reduction Program

Units Reported	Description
mg/L	Milligrams per Liter

Re: G.L. Erwin - 039124 Work Order: **1007960**

Dear Patricia,

ALS Laboratory Group received 25 samples on 30-Jul-2010 for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Laboratory Group and for only the analyses requested. Results are expressed as "as received" unless otherwise noted.

QC sample results for this data met EPA or laboratory specifications except as noted in the Case Narrative or as noted with qualifiers in the QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained by ALS Laboratory Group. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 52.

If you have any questions regarding this report, please feel free to call me.

Sincerely,

Hector Coronado

Case Narrative

Batch 45073, Metals, (sample MW-6-072810), MS/MSD recoveries were outside the control limits.

Batch 45115, Metals, (sample 1008079-01), MS/MSD is for an unrelated sample.

Batch R95425, Anions by E300, (sample MW-1-072810 & MW-15-072810), MS/MSD recoveries were outside the control limits.

Batch R95428, Anions by E300, (sample Dup-2-072810), MS/MSD recoveries were outside the control limits.

Batch R95474, Anions by E300, (sample MW-1-072810), MS/MSD recoveries were outside the control limits.

Batch R95502, Anions by E300, (sample Dup-2-072810), MS/MSD recoveries were outside the control limits.

Batch R95557, Anions by E300, (sample 1008160-01), MS/MSD is for an unrelated sample.

Batch R95631, Anions by E300, (sample 1008396-01), MS/MSD is for an unrelated sample.

WorkOrder: **1007960**

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
a	Not accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
J	Analyte detected below quantitation limit
M	Manually integrated, see raw data for justification
n	Not offered for accreditation
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
MBLK	Method Blank
MDL	Method Detection Limit
MQL	Method Quantitation Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PDS	Post Digestion Spike
PQL	Practical Quantitaion Limit
SD	Serial Dilution
SDL	Sample Detection Limit
TRRP	Texas Risk Reduction Program

Units Reported	Description
mg/L	Milligrams per Liter
