NATURE OF RELEASE

Type of Release oil	Volume of Release 6 bbls	Volume Recovered 0 bbls
Source of Release	Date and Hour of Occurrence 1-29-2013	Date and Hour of Discovery 1-30-13
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Mike Bratcher- NMOCD; Jim Amos- BLM	
By Whom? Chris Jones	Date and Hour 2-6-2013 0800am	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*
Dump valve on separator did not operate properly and fluid went out the top of the temporary flare stack.

Describe Area Affected and Cleanup Action Taken.*
Pasture area was affected. After lab results are analyzed a work plan will be pitched to the NMOCD and BLM and agreed upon for cleanup procedures.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Chris,

I inspected the spill area on 02/12/2013. We still need your C-141 for this spill. While I was there I noticed a few other environmental concerns. All secondary and chemical catch basins must be netted. The transfer pump is leaking. There are 5 gallon buckets on the south side of the location leaking fluid. There is conduit and debris on the south side of the location. The LACT and VRU are tan. Are they temporary?

Thanks
