Dear Ms. Staley:

We have reviewed your application to commingle production downhole from the Basin Dakota and the Otero Chacra Pools in the following well:

**Florance #124E**  
**1030' FSL, 1190' FWL, Section 27, T-29N, R-9W**  
**San Juan County, New Mexico**

The referenced well is located on Federal lease No. SF-080246, with production from both formations reported to the lease. Production profiles were analyzed to determine if future allocation based on percentages would be equitable. Both formations have been declining at similar rates for the past year. Your Application and allocation method, are hereby approved as submitted, effective the date that actual commingling of the pools occurs. Approved allocation factors are:

<b>Formation</b>	<b>Gas</b>	<b>Condensate</b>
Basin Dakota	56%	91%
Otero Chacra	44%	9%

If you have any questions regarding this correspondence, please contact Ray Hager at (505) 599-6366.

Sincerely,

/s/ Duane Spencer
