**NATURE OF RELEASE**

Type of Release Produced water	Volume of Release 25 bbls	Volume Recovered: None
Source of Release 3" water dump line	Date and Hour of Occurrence 4/4/13 time unknown	Date and Hour of Discovery 4/4/13 10:00 a.m.
Was Immediate Notice Given? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom?	
By Whom?	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\* The 3" water dump line from the heater-treater to the water tank developed a leak due to internal corrosion. A repair clamp was placed on the affected area of the pipe.

Describe Area Affected and Cleanup Action Taken.\* The spill affected approximately 5800 sq.ft. of caliche well pad and tank battery pad. The saturated soil was scraped and stockpiled on site pending further remediation activities. The spill area will be remediated following the NMOCD and BLM guidelines for spills and releases.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
