**NATURE OF RELEASE**

Type of Release	Produced Water	Volume of Release	Unknown	Volume Recovered	None
Source of Release	Produced Water Tank	Date and Hour of Occurrence	Unknown	Date and Hour of Discovery	1/25/13
Was Immediate Notice Given?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Not Required	If YES, To Whom?			
By Whom?	Date and Hour				
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.			

If a Watercourse was Impacted, Describe Fully.\*

OTW = 46'

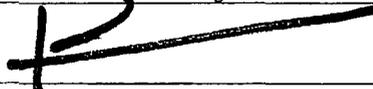

Describe Cause of Problem and Remedial Action Taken.\*

The produced water tank had a hole in the bottom and a Letter of Violation was written on 1/25/13. The water tank was removed from the location.

Describe Area Affected and Cleanup Action Taken.\*

The produced water tank was located in a 30' x 30' bermed area. A soil boring was installed and soil samples were collected in five foot increments, from surface to a depth of 46' below ground surface (bgs). Soil samples were analyzed for chloride concentrations. Chloride concentrations decreased with depth and were reported less than 250 mg/kg at a depth of 45' bgs (93.6 mg/kg). A three foot thick hard rock layer was encountered at a depth of approximately 4.5' to 8' bgs, and an eleven foot hard rock layer was encountered at a depth of approximately 12' to 23' bgs. Groundwater at the location is thought to occur at 55' bgs; however, no indication of groundwater was encountered during the soil boring installation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
