Describe Cause of Problem and Remedial Action Taken.*
A water transfer line ruptured at the tin horn by the Martha AIK Federal #6 location.

Describe Area Affected and Cleanup Action Taken.*
An approximate area of 20' X 350'. The release occurred to the south and southwest of the tin horn. All wells were turned off, water pumps were shut off, personnel ensured that no leaks continued and the line was repaired. A crew will be called to do initial clean-up of the area, and all excavated soils will be disposed of at an approved NMOCD facility. Vertical and horizontal delineation samples will be taken and sent to a NMOCD approved facility. **Depth to Ground Water: >100' (approximately 448', Section 16, T22S-R31E, per NMOSE, Wellhead Protection Area: No, Distance to Surface Water Body: >1000', SITE RANKING IS 0.**

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Yes it is, many times when the release occurs the amounts are just estimated until the produced water is vacuumed up or exact release amounts are known.

Thank you.
