OXY USA Inc., respectfully requests authorization to surface commingle produced fluids (oil, gas, & water) from the Cedar Canyon 27 Federal COM 1H well, Cedar Canyon 28 Federal COM 2H well, and Gaines 28 Federal COM #1 well at the Gaines 28 #005 Battery.

Produced oil from each well will be metered after separation by dedicated coriolis flow meters. The oil streams will then be commingled for transfer to the adjacent Gaines 28 State #5 well pad for further processing. The gas streams will be individually metered by orifice plate flow meters before being commingled and transferred to the Gaines 28 State #5 well pad. Produced water from each well will be individually metered by turbine water flow meters before being commingled. The Gaines 28 State #5 well has its own dedicated oil storage tank.

The working interest, royalty and overriding royalty interest owners in the subject wells are different therefore notification is required (sent certified return receipt 6-11-2013). The proposed commingling of production is to increase the amount of usable surface lease area and reduce operating expense between the wells which will result in the increase economic life of the wells.

BLM has also been notified of this proposal by copy of Form 3160-5.

OXY USA, Inc., respectfully requests authorization to surface commingle produced fluids (oil, gas, & water) from the Cedar Canyon 27 Federal COM 1H well, Cedar Canyon 28 Federal COM 2H well, and Gaines 28 Federal COM #1H well at the Gaines 28 #005 Battery. Oil will be measured using Coriolis meters, gas will be measured using orifice meters and water will be measured using turbine meters.

Each well will have its own separator and meters. Produced oil and gas will then be sent from Cedar Canyon 28 federal COM #2 facility to Gaines 28 #005 Battery where federal oil will be commingled in sales tanks and state the oil will be stored in a separate tank.

The working interest, royalty and overriding royalty interest owners in the subject wells are different therefore notification is required (sent certified return receipt 6-11-2013).

The proposed commingling of production is to increase the amount of usable surface lease area and reduce operating expense between the wells which will result in increased economic life of the wells

(Instructions on page 2)

GENERAL INSTRUCTIONS

This form is designed for submitting proposals to perform certain well operations and reports of such operations when completed as indicated on Federal and Indian lands pursuant to applicable Federal law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local area or regional procedures and practices, are either shown below, will be issued by or may be obtained from the local Federal office.

SPECIFIC INSTRUCTIONS

Item 4 - Locations on Federal or Indian land should be described in accordance with Federal requirements. Consult the local Federal office for specific instructions.

Item 13 - Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by the local Federal office. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to the top of any tubing left in the hole; method of closing top of well and date well site conditioned for final inspection looking for approval of the abandonment.

NOTICES

The Privacy Act of 1974 and the regulation in 43 CFR 2.48(d) provide that you be furnished the following information in connection with information required by this application.

AUTHORITY: 30 U.S.C. 181 et seq., 351 et seq., 25 U.S.C. 396; 43 CFR 3160.

PRINCIPAL PURPOSE: The information is used to: (1) Evaluate, when appropriate, approve applications, and report completion of subsequent well operations, on a Federal or Indian lease; and (2) document for administrative use, information for the management, disposal and use of National Resource lands and resources, such as: (a) evaluating the equipment and procedures to be used during a proposed subsequent well operation and reviewing the completed well operations for compliance with the approved plan; (b) requesting and granting approval to perform those actions covered by 43 CFR 3162.3-2, 3162.3-3, and 3162.3-4; (c) reporting the beginning or resumption of production, as required by 43 CFR 3162.4-1(c) and (d) analyzing future applications to drill or modify operations in light of data obtained and methods used.

ROUTINE USES: Information from the record and/or the record will be transferred to appropriate Federal, State, local or foreign agencies, when relevant to civil, criminal or regulatory investigations or prosecutions in connection with congressional inquiries or to consumer reporting agencies to facilitate collection of debts owed the Government.

EFFECT OF NOT PROVIDING THE INFORMATION: Filing of this notice and report and disclosure of the information is mandatory for those subsequent well operations specified in 43 CFR 3162.3-2, 3162.3-3, 3162.3-4.

The Paperwork Reduction Act of 1995 requires us to inform you that:

The BLM collects this information to evaluate proposed and/or completed subsequent well operations on Federal or Indian oil and gas leases.

Response to this request is mandatory.

The BLM would like you to know that you do not have to respond to this or any other Federal agency-sponsored information collection unless it displays a currently valid OMB control number.

BURDEN HOURS STATEMENT: Public reporting burden for this form is estimated to average 8 hours per response, including the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Dear Sir or Madam,

This letter serves as a notification of plans to commingle produced fluids from facilities that you are an interest owner in. Commingling is defined as the measuring, combining, and storing of produced fluid at an off lease location. This action requires accurate measurement of fluid volumes from each lease site to ensure proper allocation of revenue. This proposition is subject to approval from the New Mexico Bureau of Land Management (NMBLM) and complies with their latest guidance regarding production measurement. The project will improve oil measurement accuracy and decrease the operational cost associated with facility and road maintenance and repair. The savings generated from this project will be passed onto interest owners. Any objection must be filed in writing with the division's Santa Fe office within 20 days from the date the division receives the application. Listed below are the well sites and battery(s) that will be affected by this project.

Subject: Withdrawal of Commingle Permit
Importance: High

Richard,

I am sending you this email to ask that you please withdrawal the application to commingle that I had submitted on June 13, 2013. Management and Operations revisited this topic and request a different approach. The corrected applications that will replace this are being sent to you via overnight FedEx today. If you have any questions, please let me know. Thank you in advance for your time and assistance.
