By Whom? Brian Wall	Date and Hour 09/12/2013 8:45am	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	
If a Watercourse was Impacted, Describe Fully.*:		
Describe Cause of Problem and Remedial Action Taken.*: had an alarm @ 7:40 am for low discharge at keel west water station went out to facility reset pump and noticed that injection header pressure did not go up to normal operating pressure notify all pumpers to keep an eye out for any leaks out on pasture or on injection wells then relief pumper call and said he was driving through a well and saw stream of water running down the road it was hard to tell because it had just rain the night before and early in the morning he started walking out following the fluid and came up to injection well that was leaking s/i line and header ASAP then we noticed that 2" injection line had blew up about 2' below ground		
Describe Area Affected and Cleanup Action Taken.* : called crew to start fixin line than had vac truck suck all standing fluid on ground and recover 45 bbls of fluid fluid ran south of well head 1300' then South West to finger about 1000' each.		
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
