Describe Area Affected and Cleanup Action Taken.*	250 APW Per Robert Grubbs. S.A.S. 10/4/2013 Initially an estimated 5bbls of oil and 205bbls of produced water were released due to a hole that developed in the steel line. The release was a 125X85 in the pasture. We were able to recover 3bbls of oil and 190bbls of produced water using vacuum trucks. Tetra Tech will sample the spill site area to delineate any possible contamination from the release and we will present a work plan to the NMOCD for approval prior to any significant remediation work.				
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
