Describe Cause of Problem and Remedial Action Taken.*
Area livestock have been rubbing the circulating line causing the 4" needle valve to break off and allow 10 bbls of oil and 5 bbls of produced water to leak onto the ground. No fluids were recovered and the valve was repaired/replaced.

Describe Area Affected and Cleanup Action Taken.*
The area affected was approximately 20' x 40' with all of the leak staying on location. Remediation will be conducted in accordance with a plan approved by NMOCD and the BLM.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

CJ,
Same. Pick up contaminants and run a couple of bottom sample tests. Thanks

You will still need to comply with state on both also.
