API #30-039-23756

Dear Mr. LeMay:

This is a request for administrative approval for downhole commingling the Blanco Mesa Verde and Basin Dakota pools in the subject well. It is intended to add the Blanco Mesa Verde formation to this Dakota well and commingle both formations.

To comply with the New Mexico Oil Conservation Division rules, Meridian is submitting the following for your approval of this commingling:

1. Form C107A - Application for Downhole Commingling;
2. C-102 plat for each zone showing its spacing unit and acreage dedication;
3. Production curve for the Dakota for at least one year;
4. Notification list of offset operators - Meridian is operator of San Juan 27-5 Unit;
5. Notification list of working, overriding, and royalty interests.

If you are a working, overriding or royalty interest owner in either of the above described pools, you are being notified of this application as a requirement of the New Mexico Oil Conservation Division Rule #303C. Meridian Oil Inc, as operator, believes this application will be in the best interest of all owners. If you have no objection to this commingling application, you do not have to respond to this notification. Upon establishment of production from this well, you will receive your proportionate share of revenues from the pool in which you own an interest according to the proposed allocation formula.

The allocation formula will be based off past Dakota production. Any production over and above Dakota predicted volumes will be allocated to the Mesa Verde.

Please let me know if you require additional data.

Sincerely,

Peggy Bradfield
Regulatory/Compliance Administrator

Mesaverde Recompletion / Commingle**

Justification for Commingling Production

There are only two options available for developing the Mesaverde in the NW/4 of section 7. They are to recomplete the San Juan 27-5 Unit #126E and commingle with Dakota production or drill a new well. The current casing configuration in the #126E (4-1/2" casing from surface to 7,809') will not accommodate a dual configuration.

Meridian Oil does not feel the reserves in the Mesaverde can be exploited economically with new drill dollars. Based on this, it is our opinion that commingling is the only viable completion option to avoid waste in the Mesaverde interval. The Dakota formation will also benefit from commingling production with the Mesaverde. Adding the Mesaverde will extend the producing life of the Dakota and increase the overall recovery.
