I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Subject: Neff Federal #1 and #3 SWD Battery

This is to inform you that Oxy Permian Primary NM South had a release at the Neff Federal #1 and #3 SWD Battery on March 17, 2014. Oxy released 400 bbls of produced water and 4 bbls of oil due to high winds making the power pole trip causing the tanks to spill over. The release is located in the Northwest quarter-section of Section 25, T22S, R31E of Eddy County, NM. BBC International will remediate the location at a later date and an initial C-141 will follow. Driving directions: At the intersection of CR 29 and Mills Ranch Road, go East on Mills Ranch Road for 0.5 mile to 1st battery on your left.
