| Describe Area Affected and Cleanup Action Taken.* At the NPG 8-6 the lease operator pulled up on location and visually noticed oil and produced water spill. He immediately shut in the well and contacted the assistant foreman for that area. The lease operator also called lobo trucking to do recovery on the 5barrels of Oil and 25 barrels of produced water. Approximately 3 barrels of Oil were recovered and 15 Produced water were recovered. Assistant Foreman's also called out TCS (backhoe operator) to assist. Lease Operator then called out for a crew to replace the 2inch nipples on the wellhead that was the cause of the corrosion where the leak was at. | | |

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
