Subject: Re: FW: COG - East High Lonesome Penrose TB - Temporary Well Installation - Gauging Notification

Mike and Ike,

I was not able to make it out to the gaging of the monitoring well, but I certainly appreciate the notification and, please, do include me on any monitoring well activities so that I can forward those notifications to our staff hydrologist. Can you tell me if this is permanent monitoring well? Our staff hydrologist is interested in the logged depth to groundwater and may be interested in obtaining a water sample for data collection purposes. I have included her email address, Carolyn Moores, so that she can read your reply.

Subject FW: COG - East High Lonesome Penrose TB - Temporary Well Installation - Gauging Notification

Mike and Terry,

Tetra Tech has completed the temporary well (total depth 220') at the site to establish the depth to ground water. Tetra Tech will be onsite March 23, 2011 (Wednesday) to gauge the well. Please let me know if you will be present to witness the gauging. Call me if you have any questions, thanks

Subject: COG - East High Lonesome Penrose TB - Temporary Well Installation - Notification

COG Operating
East High Lonesome Penrose TB
Section 15, T16S, R29E, Unit G
Eddy County, New Mexico

On March 3, 2011, Tetra Tech met with Mike Bratcher to discussed the assessment data on the East High Lonesome TB and the High Lonesome Penrose TB #2. Based on the sparse groundwater data in the area, Mr. Bratcher recommended a Temporary Well be installed at the East High Lonesome TB to establish depth to groundwater in the area. Based on the findings, the work plan would be submitted for review and approval. Tetra Tech has scheduled the installation of the Temporary Well for Monday (3-14-11). Once completed, the well will be gauged after 48 hours. We will contact you to witness the gauging, if available. Please call me if you have any questions, thanks
